

UNITED STATES SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, D.C. 20549

FORM 10-Q

QUARTERLY REPORT UNDER SECTION 13 OR 15(D) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended March 31, 2020

TRANSITION REPORT UNDER SECTION 13 OR 15 (d) OF THE SECURITIES EXCHANGE ACT

For the transition period from _____ to _____

Commission File number 000-30262

KNOW LABS, INC.

(Exact name of registrant as specified in charter)

Nevada

(State or other jurisdiction of incorporation or organization)

90-0273142

(I.R.S. Employer Identification No.)

500 Union Street, Suite 810, Seattle,
Washington USA

(Address of principal executive offices)

98101

(Zip Code)

206-903-1351

(Registrant's telephone number, including area code)

(Former name, address, and fiscal year, if changed since last report)

Securities registered pursuant to Section 12(b) of the Act: None

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company", and "emerging growth company" in Rule 12b-2

Large accelerated filer	<input type="checkbox"/>	Accelerated filer	<input type="checkbox"/>
Non-accelerated filer (Do not check if a smaller reporting company)	<input type="checkbox"/>	Smaller reporting company	<input checked="" type="checkbox"/>
Emerging growth company	<input type="checkbox"/>		

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

The number of shares of common stock, \$.001 par value, issued and outstanding as of May 15, 2020: 23,679,245 shares.

KNOW LABS, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

The accompanying unaudited consolidated condensed financial statements have been prepared by Know Labs, Inc, formerly Visualant, Incorporated (“the Company”, “us,” “we,” or “our”) in accordance with U.S. generally accepted accounting principles (“GAAP”) for interim financial reporting and rules and regulations of the Securities and Exchange Commission. Accordingly, certain information and footnote disclosures normally included in financial statements prepared in accordance with GAAP have been condensed or omitted. In the opinion of our management, all adjustments, consisting of only normal recurring accruals, necessary for a fair presentation of the financial position, results of operations, and cash flows for the fiscal periods presented have been included.

These financial statements should be read in conjunction with the audited financial statements and related notes included in our Annual Report filed on Form 10-K for the year ended September 30, 2019, filed with the Securities and Exchange Commission (“SEC”) on December 27, 2019. The results of operations for the six months ended March 31, 2020 are not necessarily indicative of the results expected for the full fiscal year, or for any other fiscal period.

1. ORGANIZATION

Know Labs, Inc. (the “Company”) was incorporated under the laws of the State of Nevada in 1998. The Company has authorized 105,000,000 shares of capital stock, of which 100,000,000 are shares of voting common stock, par value \$0.001 per share, and 5,000,000 are shares preferred stock, par value \$0.001 per share.

The Company is focused on the development, marketing and sales of proprietary technologies which are capable of uniquely identifying or authenticating almost any substance or material using electromagnetic energy to record, detect, and identify the unique “signature” of the substance or material. We call these our “Bio-RFID™” and “ChromaID™” technologies.

Historically, the Company focused on the development of our proprietary ChromaID technology. Using light from low-cost LEDs (light emitting diodes) the ChromaID technology maps the color of substances, fluids and materials. With the Company’s proprietary processes, the Company can authenticate and identify based upon the color that is present. The color is both visible to us as humans but also outside of the humanly visible color spectrum in the near infra-red and near ultra-violet and beyond. The Company’s ChromaID scanner sees what we like to call “Nature’s Color Fingerprint.” Everything in nature has a unique color identifier and with ChromaID the Company can see, and identify, and authenticate based upon the color that is present. The Company’s ChromaID scanner is capable of uniquely identifying and authenticating almost any substance or liquid using light to record, detect and identify its unique color signature. More recently, the Company has focused upon extensions and new inventions that are derived from and extend beyond our ChromaID technology. The Company calls this new technology “Bio-RFID.” The rapid advances made with our Bio-RFID technology in our laboratory have caused us to move quickly into the commercialization phase of our Company as the Company works to create revenue generating products for the marketplace. Today, the sole focus of the Company is on its Bio-RFID technology and its commercialization.

In 2010, the Company acquired TransTech Systems, Inc. as an adjunct to the Company’s business. TransTech is a distributor of products for employee and personnel identification and authentication. TransTech has historically provided substantially all of the Company’s revenues. The financial results from our TransTech subsidiary have been diminishing as vendors of their products increasingly move to the Internet and direct sales to their customers. While it does provide the Company’s current revenues, it is not central to the Company’s current focus. Moreover, the Company has written down any goodwill associated with this acquisition. The Company expects to shut down TransTech completely by June 30, 2020.

The Company is in the process of commercializing its Bio-RFID technology. The Company plans its first commercial applications to be a wearable non-invasive Continuous Glucose Monitor. This product will require approval from the United States Food and Drug Administration prior to introduction to the market. In addition, it has a technology license agreement with Allied Inventors, formerly Xinova and Invention Development Management Company, a subsidiary of Intellectual Ventures.

The Company believes that its commercialization success is dependent upon its ability to significantly increase the number of customers that are purchasing and using its products. To date the Company has generated minimal revenue from sales of products derived from its ChromaID and Bio-RFID technology. The Company is currently not profitable. Even if the Company succeeds in introducing its technology and related products to its target markets, the Company may not be able to generate sufficient revenue to achieve or sustain profitability. Regulatory requirements may also inhibit the speed with which the Company’s products can enter the marketplace.

ChromaID was invented by scientists under contract with the Company. Bio-RFID was invented by individuals working for the Company. The Company actively pursues a robust intellectual property strategy and has been granted fourteen patents. The Company also has several patents pending. The Company possesses all right, title and interest to the issued patents. Nine additional issued and pending patents are licensed exclusively to the Company in perpetuity by the Company’s strategic partner, Allied Inventors.

2. GOING CONCERN

The accompanying financial statements have been prepared on a going concern basis, which contemplates the realization of assets and the satisfaction of liabilities in the normal course of business. The Company incurred net losses \$6,345,526, \$7,612,316 and \$3,257,597 for the six months ended March 31, 2020 and the years ended September 30, 2019 and 2018, respectively. Net cash used in operating activities was \$1,668,330, \$3,104,035 and \$1,117,131 for the six months ended March 31, 2020 and the years ended September 30, 2019 and 2018, respectively. During the six months ended March 31, 2020 and 2019, the Company incurred non-cash expenses of \$4,510,430 and \$1,145,653.

The Company anticipates that it will record losses from operations for the foreseeable future. As of March 31, 2020, the Company's accumulated deficit was \$48,749,166. The Company has limited capital resources, and operations to date have been funded with the proceeds from private equity and debt financings and loans from Ronald P. Erickson, the Company's Chairman of the Board and Interim Chief Financial Officer, or entities with which he is affiliated. These conditions raise substantial doubt about our ability to continue as a going concern. The audit report prepared by the Company's independent registered public accounting firm relating to our consolidated financial statements for the year ended September 30, 2019 includes an explanatory paragraph expressing the substantial doubt about the Company's ability to continue as a going concern.

The Company believes that its cash on hand and received since March 31, 2020 will be sufficient to fund our operations until early 2021. The Company needs additional financing to implement our business plan and to service our ongoing operations and pay our current debts. There can be no assurance that we will be able to secure any needed funding, or that if such funding is available, the terms or conditions would be acceptable to us. If we are unable to obtain additional financing when it is needed, we will need to restructure our operations, and divest all or a portion of our business. We may seek additional capital through a combination of private and public equity offerings, debt financings and strategic collaborations. Debt financing, if obtained, may involve agreements that include covenants limiting or restricting our ability to take specific actions, such as incurring additional debt, and could increase our expenses and require that our assets secure such debt. Equity financing, if obtained, could result in dilution to the Company's then-existing stockholders and/or require such stockholders to waive certain rights and preferences. If such financing is not available on satisfactory terms, or is not available at all, the Company may be required to delay, scale back, eliminate the development of business opportunities and our operations and financial condition may be materially adversely affected.

3. SIGNIFICANT ACCOUNTING POLICIES: ADOPTION OF ACCOUNTING STANDARDS

Basis of Presentation – The accompanying unaudited consolidated financial statements include the accounts of the Company. Intercompany accounts and transactions have been eliminated. The preparation of these unaudited condensed consolidated financial statements were prepared in conformity with U.S. generally accepted accounting principles ("GAAP").

Principles of Consolidation – The consolidated financial statements include the accounts of the Company and its wholly owned and majority-owned subsidiaries, TransTech Systems, Inc and RAAI Lighting, Inc. Inter-Company items and transactions have been eliminated in consolidation.

Cash and Cash Equivalents – The Company classifies highly liquid temporary investments with an original maturity of three months or less when purchased as cash equivalents. The Company maintains cash balances at various financial institutions. Balances at US banks are insured by the Federal Deposit Insurance Corporation up to \$250,000. The Company has not experienced any losses in such accounts and believes it is not exposed to any significant risk for cash on deposit. At March 31, 2020, the Company had uninsured deposits in the amount of \$526,752.

Accounts Receivable and Revenue – The Company recognizes revenue in accordance with ASC Topic 606, Revenue from Contracts with Customers, which requires the application of the five-step-principles-based-accounting-model for revenue recognition. These steps include (1) a legally enforceable contract, written or unwritten is identified; (2) performance obligations in the contracts are identified; (3) the transaction price reflecting variable consideration, if any, is identified; (4) the transaction price is allocated to the performance obligations; and (5) revenue is recognized when the control of goods is transferred to the customer at a particular time or over time. For TransTech, the Company extends thirty day terms to some customers. Accounts receivable are reviewed periodically for collectability.

TransTech Systems Inc. sells products directly to customers. Our products are typically sold pursuant to purchase orders placed by our customers, and our terms and conditions of sale do not require customer acceptance. We account for a contract with a customer when there is a legally enforceable contract, which could be the customer's purchase order, the rights of the parties are identified, the contract has commercial terms, and collectability of the contract consideration is probable. The majority of our contracts have a single performance obligation to transfer products and are short term in nature, usually less than one year. Our revenue is measured based on the consideration specified in the contract with each customer in exchange for transferring products that is generally based upon a negotiated, formula, list or fixed price. Revenue is recognized when control of the promised goods is transferred to our customer, which is either upon shipment from our dock, receipt at the customer's dock, or removal from consignment inventory at the customer's location, in an amount that reflects the consideration we expect to be entitled to receive in exchange for those goods.

Allowance for Doubtful Accounts - We maintain an allowance for uncollectible accounts receivable. It is our practice to regularly review and revise, when deemed necessary, our estimates of uncollectible accounts receivable, which are based primarily on actual historical return rates. We record estimated uncollectible accounts receivable as selling, general and administrative expense. As of March 31, 2020 and September 30, 2019, there was a reserve for sales returns of \$0 and \$40,000, respectively, which is minimal based upon our historical experience.

Inventories – Inventories consist primarily of printers and consumable supplies, including ribbons and cards, badge accessories, capture devices, and access control components held for resale and are stated at the lower of cost or market on the first-in, first-out (“FIFO”) method. Inventories are considered available for resale when drop shipped and invoiced directly to a customer from a vendor, or when physically received by TransTech. The Company records a provision for excess and obsolete inventory whenever an impairment has been identified. There is a \$0 and \$28,000 reserve for impaired inventory as of March 31, 2020 and September 30, 2019.

Equipment – Equipment consists of machinery, leasehold improvements, furniture and fixtures and software, which are stated at cost less accumulated depreciation and amortization. Depreciation is computed by the straight-line method over the estimated useful lives or lease period of the relevant asset, generally 2-10 years, except for leasehold improvements which are depreciated over 5 years.

Long-Lived Assets – The Company reviews its long-lived assets for impairment annually or when changes in circumstances indicate that the carrying amount of an asset may not be recoverable. Long-lived assets under certain circumstances are reported at the lower of carrying amount or fair value. Assets to be disposed of and assets not expected to provide any future service potential to the Company are recorded at the lower of carrying amount or fair value (less the projected cost associated with selling the asset). To the extent carrying values exceed fair values, an impairment loss is recognized in operating results.

Intangible Assets – Intangible assets are capitalized and amortized on a straight-line basis over their estimated useful life, if the life is determinable. If the life is not determinable, amortization is not recorded. We regularly perform reviews to determine if facts and circumstances exist which indicate that the useful lives of our intangible assets are shorter than originally estimated or the carrying amount of these assets may not be recoverable. When an indication exists that the carrying amount of intangible assets may not be recoverable, we assess the recoverability of our assets by comparing the projected undiscounted net cash flows associated with the related asset or group of assets over their remaining lives against their respective carrying amounts. Such impairment test is based on the lowest level for which identifiable cash flows are largely independent of the cash flows of other groups of assets and liabilities. Impairment, if any, is based on the excess of the carrying amount over the estimated fair value of those assets.

Research and Development Expenses – Research and development expenses consist of the cost of employees, consultants and contractors who design, engineer and develop new products and processes as well as materials, supplies and facilities used in producing prototypes.

The Company’s current research and development efforts are primarily focused on improving our Bio-RFID technology, extending its capacity and developing new and unique applications for this technology. As part of this effort, the Company conducts on-going laboratory testing to ensure that application methods are compatible with the end-user and regulatory requirements, and that they can be implemented in a cost-effective manner. The Company also is actively involved in identifying new applications. The Company’s current internal team along with outside consultants has considerable experience working with the application of the Company’s technologies and their applications. The Company engages third party experts as required to supplement our internal team. The Company believes that continued development of new and enhanced technologies is essential to our future success. We incurred expenses of \$938,303, \$1,257,872 and \$570,514 for the six months ended March 31, 2020 and the years ended September 30, 2019 and 2018, respectively, on development activities.

Fair Value Measurements and Financial Instruments – ASC Topic 820, *Fair Value Measurement and Disclosures*, defines fair value as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. This topic also establishes a fair value hierarchy, which requires classification based on observable and unobservable inputs when measuring fair value. The fair value hierarchy distinguishes between assumptions based on market data (observable inputs) and an entity’s own assumptions (unobservable inputs). The hierarchy consists of three levels:

Level 1 – Quoted prices in active markets for identical assets and liabilities;

Level 2 – Inputs other than level one inputs that are either directly or indirectly observable; and

Level 3 – Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The recorded value of other financial assets and liabilities, which consist primarily of cash and cash equivalents, accounts receivable, other current assets, and accounts payable and accrued expenses approximate the fair value of the respective assets and liabilities as of March 31, 2020 and September 30, 2019 are based upon the short-term nature of the assets and liabilities.

The Company has a money market account which is considered a level 1 asset. The balance as of March 31, 2020 and September 30, 2019 was \$651,722 and \$1,901,278, respectively.

Derivative Financial Instruments –Pursuant to ASC 815 “Derivatives and Hedging”, the Company evaluates all of its financial instruments to determine if such instruments are derivatives or contain features that qualify as embedded derivatives. The Company then determines if embedded derivative must bifurcated and separately accounted for. For derivative financial instruments that are accounted for as liabilities, the derivative instrument is initially recorded at its fair value and is then re-valued at each reporting date, with changes in the fair value reported in the consolidated statements of operations. For stock-based derivative financial instruments, the Company uses a Black-Scholes-Merton option pricing model to value the derivative instruments at inception and on subsequent valuation dates. The classification of derivative instruments, including whether such instruments should be recorded as liabilities or as equity, is evaluated at the end of each reporting period. Derivative instrument liabilities are classified in the balance sheet as current or non-current based on whether or not net-cash settlement of the derivative instrument could be required within twelve months of the balance sheet date.

The Company determined that none of the conversion features within its currently outstanding convertible notes payable must be bifurcated and thus there was no derivative liability as of March 31, 2020 and September 30, 2019.

Stock Based Compensation - The Company has share-based compensation plans under which employees, consultants, suppliers and directors may be granted restricted stock, as well as options and warrants to purchase shares of Company common stock at the fair market value at the time of grant. Stock-based compensation cost to employees is measured by the Company at the grant date, based on the fair value of the award, over the requisite service period under ASC 718. For options issued to employees, the Company recognizes stock compensation costs utilizing the fair value methodology over the related period of benefit.

Convertible Securities – Based upon ASC 815-15, we have adopted a sequencing approach regarding the application of ASC 815-40 to convertible securities. We will evaluate our contracts based upon the earliest issuance date. In the event partial reclassification of contracts subject to ASC 815-40-25 is necessary, due to our inability to demonstrate we have sufficient shares authorized and unissued, shares will be allocated on the basis of issuance date, with the earliest issuance date receiving first allocation of shares. If a reclassification of an instrument were required, it would result in the instrument issued latest being reclassified first.

Net Loss per Share – Under the provisions of ASC 260, “Earnings Per Share,” basic loss per common share is computed by dividing net loss available to common stockholders by the weighted average number of shares of common stock outstanding for the periods presented. Diluted net loss per share reflects the potential dilution that could occur if securities or other contracts to issue common stock were exercised or converted into common stock. As of March 31, 2020, there were options outstanding for the purchase of 4,891,334 common shares (including unearned stock option grants totaling 2,680,000 shares related to performance targets), warrants for the purchase of 17,755,448 common shares, and 8,108,356 shares of the Company’s common stock issuable upon the conversion of Series C and Series D Convertible Preferred Stock. In addition, the Company currently had 10,167,804 common shares (9,020,264 common shares at the current price of \$0.25 per share and 1,147,540 common shares at the current price of \$1.00 per share) and are issuable upon conversion of convertible debentures of \$3,402,606. All of which could potentially dilute future earnings per share.

As of March 31, 2019, there were options outstanding for the purchase of 2,282,668 common shares, warrants for the purchase of 17,572,583 common shares, and 4,894,071 shares of the Company’s common stock issuable upon the conversion of Series A, Series C and Series D Convertible Preferred Stock. In addition, the Company currently has 12,829,329 common shares (9,020,264 common shares at the current price of \$0.25 per share and 3,808,975 common shares at the current price of \$1.00 per share) and are issuable upon conversion of convertible debentures of \$6,060,041. All of which could potentially dilute future earnings per share.

Dividend Policy – The Company has never paid any cash dividends and intends, for the foreseeable future, to retain any future earnings for the development of our business. Our future dividend policy will be determined by the board of directors on the basis of various factors, including our results of operations, financial condition, capital requirements and investment opportunities.

Use of Estimates – The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Recent Accounting Pronouncements

Based on the Company’s review of accounting standard updates issued since the filing of the 2019 Form 10-K, there have been no other newly issued or newly applicable accounting pronouncements that have had, or are expected to have, a significant impact on the Company’s consolidated financial statements.

4. ACCOUNTS RECEIVABLE/CUSTOMER CONCENTRATION

Accounts receivable were \$0 and \$63,049, net of allowance, as of March 31, 2020 and September 30, 2019, respectively. The Company has a total allowance for bad debt in the amount of \$0 and \$40,000 as of March 31, 2020 and September 30, 2019, respectively. The decrease in accounts receivable related to the winddown of TransTech.

5. INVENTORIES

Inventories were \$0 and \$7,103 as of March 31, 2020 and September 30, 2019, respectively. Inventories consisted primarily of printers and consumable supplies, including ribbons and cards, badge accessories, capture devices, and access control components held for resale. There was a \$0 and \$28,000 reserve for impaired inventory as of March 31, 2020 and September 30, 2019, respectively. The decrease in inventory related to the winddown of TransTech.

6. FIXED ASSETS

Fixed assets, net of accumulated depreciation, was \$119,774 and \$130,472 as of March 31, 2020 and September 30, 2019, respectively. Accumulated depreciation was \$221,490 and \$379,259 as of March 31, 2020 and September 30, 2019, respectively. Total depreciation expense was \$34,079 and \$18,491 for the six months ended March 31, 2020 and 2019, respectively. All equipment is used for selling, general and administrative purposes and accordingly all depreciation is classified in selling, general and administrative expenses.

Property and equipment as of March 31, 2020 and September 30, 2019 was comprised of the following:

	<u>Estimated Useful Lives</u>	<u>March 31, 2020</u>	<u>September 30, 2019</u>
Machinery and equipment	2-10 years	\$ 310,797	\$ 412,238
Leasold improvements	2-3 years	3,612	3,612
Furniture and fixtures	2-3 years	26,855	58,051
Software and websites	3- 7 years	-	35,830
Less: accumulated depreciation		(221,490)	(379,259)
		<u>\$ 119,774</u>	<u>\$ 130,472</u>

The Company retired assets at TransTech with a net book value of \$4,358 as of March 31, 2020.

7. INTANGIBLE ASSETS

Intangible assets as of March 31, 2020 and September 30, 2019 consisted of the following:

	Estimated Useful Lives	March 31, 2020	September 30, 2019
Technology	3 years	\$ 520,000	\$ 520,000
Less: accumulated amortization		(332,220)	(245,554)
Intangible assets, net		<u>\$ 187,780</u>	<u>\$ 274,446</u>

Total amortization expense was \$86,666 for the six months ended March 31, 2020 and 2019, respectively.

Merger with RAAI Lighting, Inc.

On April 10, 2018, the Company entered into an Agreement and Plan of Merger with 500 Union Corporation, a Delaware corporation and a wholly owned subsidiary of the Company, and RAAI Lighting, Inc., a Delaware corporation. Pursuant to the Merger Agreement, the Company acquired all the outstanding shares of RAAI's capital stock through a merger of Merger Sub with and into RAAI (the "Merger"), with RAAI surviving the Merger as a wholly owned subsidiary of the Company.

Under the terms of the Merger Agreement, each share of RAAI common stock issued and outstanding immediately before the Merger (1,000 shares) was cancelled and the Company issued 2,000,000 shares of the Company's common stock. As a result, the Company issued 2,000,000 shares of its common stock to Phillip A. Bosua, formerly the sole stockholder of RAAI. The consideration for the Merger was determined through arms-length bargaining by the Company and RAAI. The Merger was structured to qualify as a tax-free reorganization for U.S. federal income tax purposes. As a result of the Merger, the Company received certain intellectual property, related to RAAI.

RAAI had no outstanding indebtedness or assets at the closing of the Merger. The 2,000,000 shares of the Company's common stock issued for RAAI's shares were recorded at the fair value at the date of the merger at \$520,000 and the value assigned to the technology acquired with RAAI.

The fair value of the intellectual property associated with the assets acquired was \$520,000 estimated by using a discounted cash flow approach based on future economic benefits. In summary, the estimate was based on a projected income approach and related discounted cash flows over five years, with applicable risk factors assigned to assumptions in the forecasted results.

Merger with Know Labs, Inc.

On May 1, 2018, Know Labs, Inc., a Nevada corporation incorporated on April 3, 2018, and our wholly-owned subsidiary, merged with and into the Company pursuant to an Agreement and Plan of Merger dated May 1, 2018. In connection with the merger, our Articles of Incorporation were effectively amended to change our name to Know Labs, Inc. by and through the filing of Articles of Merger. This parent-subsiidiary merger was approved by us, the parent, in accordance with Nevada Revised Statutes Section 92A.180. Stockholder approval was not required. This amendment was filed with the Nevada Secretary of State and became effective on May 1, 2018.

8. ACCOUNTS PAYABLE

Accounts payable were \$693,598 (including \$308,641 related to TransTech) and \$810,943 as of March 31, 2020 and September 30, 2019, respectively. Such liabilities consisted of amounts due to vendors for inventory purchases and technology development, external audit, legal and other expenses incurred by the Company. The Company expects to settle the TransTech accounts payable during 2020. The Company expects to shut down TransTech completely by June 30, 2020.

9. LEASES

The Company has entered into operating leases for office and development facilities. These leases have terms which range from two to three years and include options to renew. These operating leases are listed as separate line items on the Company's March 31, 2020 and September 30, 2019 Consolidated Balance Sheets and represent the Company's right to use the underlying asset for the lease term. The Company's obligation to make lease payments are also listed as separate line items on the Company's March 31, 2020 and September 30, 2019 Consolidated Balance Sheets. Based on the present value of the lease payments for the remaining lease term of the Company's existing leases, the Company recognized right-of-use assets and lease liabilities for operating leases of approximately \$250,000 on October 1, 2018. Operating lease right-of-use assets and liabilities commencing after October 1, 2018 are recognized at commencement date based on the present value of lease payments over the lease term. During the six months ended March 31, 2020 and the year ended September 30, 2019, the Company had one lease expire and recognized the rent payments as an expense in the current period. As of March 31, 2020 and September 30, 2019, total right-of-use assets and operating lease liabilities for remaining long term lease was approximately \$130,000 and \$246,000, respectively. In the six months ended March 31, 2020 and 2019, the Company recognized approximately \$67,914 and \$100,482, respectively in total lease costs for the leases.

Because the rate implicit in each lease is not readily determinable, the Company uses its incremental borrowing rate to determine the present value of the lease payments.

Information related to the Company's operating right-of-use assets and related lease liabilities as of and for the six months ended March 31, 2020 was as follows:

Cash paid for ROU operating lease liability \$66,998

Weighted-average remaining lease term 2 years

Weighted-average discount rate 10%

The minimum future lease payments as of March 31, 2020 are as follows:

Year	\$
2021	\$ 133,996
2022	12,086
2023	0
2024	-
	146,082
Imputed interest	(14,608)
Total lease liability	\$ 131,474

10. CONVERTIBLE NOTES PAYABLE

Convertible notes payable as of March 31, 2020 and September 30, 2019 consisted of the following:

Convertible Promissory Notes with Clayton A. Struve

The Company owes Clayton A. Struve \$1,071,000 under convertible promissory or OID notes. The Company recorded accrued interest of \$67,801 and \$62,171 as of March 31, 2020 and September 30, 2019, respectively. On May 8, 2019, the Company signed Amendment 2 to the convertible promissory or OID notes, extending the due dates to September 30, 2019. On November 26, 2019, the Company signed Amendments to the convertible promissory or OID notes, extending the due dates to March 31, 2020. Mr. Struve also invested \$1,000,000 in the May 2019 Debt Offering. On May 11, 2020, the Company signed Amendments to the convertible promissory or OID notes, extending the due dates to September 30, 2020.

Convertible Redeemable Promissory Notes with Ronald P. Erickson and J3E2A2Z

On March 16, 2018, the Company entered into a Note and Account Payable Conversion Agreement pursuant to which (a) all \$664,233 currently owing under the J3E2A2Z Notes was converted to a Convertible Redeemable Promissory Note in the principal amount of \$664,233, and (b) all \$519,833 of the J3E2A2Z Account Payable was converted into a Convertible Redeemable Promissory Note in the principal amount of \$519,833 together with a warrant to purchase up to 1,039,666 shares of common stock of the Company for a period of five years. The initial exercise price of the warrants described above is \$0.50 per share, also subject to certain adjustments. The warrants were valued at \$110,545. Because the note is immediately convertible, the warrants and beneficial conversion were expensed as interest. The Company recorded accrued interest of \$109,583 and \$73,964 as of March 31, 2020 and September 30, 2019, respectively. On May 8, 2019, the Company signed Amendment 1 to the convertible redeemable promissory notes, extending the due dates to September 30, 2019 and increasing the interest rate to 6%. On November 26, 2019, the Company signed Amendment 2 to the convertible promissory or OID notes, extending the due dates to March 31, 2020. On May 11, 2020, the Company signed Amendment 3 to the convertible promissory or OID notes, extending the due dates to September 30, 2020.

Debt Offering which Closed May 28, 2019

On May 28, 2019, the Company closed additional rounds of a debt offering and received gross proceeds of \$4,242,515 in exchange for issuing Subordinated Convertible Notes (the "Convertible Notes") and Warrants (the "Warrants") in a private placement to 54 accredited investors, pursuant to a series of substantially identical Securities Purchase Agreements, Common Stock Warrants, and related documents. The Convertible Notes will be automatically converted to Common Stock at \$1.00 per share on the one year anniversary starting on February 15, 2020.

The Convertible Notes had an original principal amount of \$4,242,515 and bear annual interest of 8%. Both the principal amount and the interest are payable on a payment-in-kind basis in shares of Common Stock of the Company (the "Common Stock").

The Warrants were granted on a 1:0.5 basis (one-half Warrant for each full share of Common Stock into which the Convertible Notes are convertible). The Warrants have a five-year term and an exercise price equal to 120% of the per share conversion price of the Qualified Financing or other mandatory conversion.

The Convertible Notes are initially convertible into 4,242,515 shares of Common Stock, subject to certain adjustments, and the Warrants are initially exercisable for 2,121,258 shares of Common Stock at an exercise price of \$1.20 per share of Common Stock, also subject to certain adjustments.

In connection with the debt offering, the placement agent for the Convertible Notes and the Warrants received a cash fee of \$361,401 and warrants to purchase 542,102 shares of the Company's common stock, all based on 8-10% of gross proceeds to the Company. The placement agent has also received a \$25,000 advisory fee. The warrants issued for these services had a fair value of \$1,072,095 at the date of issuance. The fair value of the warrants was recorded as debt discount (with an offset to APIC) and will be amortized over the one-year term of the Convertible Notes. The \$361,401 cash fee was recorded as issuance costs and will be amortized over the one-year term of the related Convertible Notes.

As part of the Purchase Agreement, the Company entered into a Registration Rights Agreement, which grants the investors "demand" and "piggyback" registration rights to register the shares of Common Stock issuable upon the conversion of the Convertible Notes and the exercise of the Warrants with the Securities and Exchange Commission for resale or other disposition. In addition, the Convertible Notes are subordinated to certain senior debt of the Company pursuant to a Subordination Agreement executed by the investors.

The Convertible Notes and Warrants were issued in transactions that were not registered under the Securities Act of 1933, as amended (the "Act") in reliance upon applicable exemptions from registration under Section 4(a)(2) of the Act and/or Rule 506 of SEC Regulation D under the Act.

In accordance to ASC 470-20-30, Debt with Conversion and Other Options, the guidance therein applies to both convertible debt and other similar instruments, including convertible preferred shares. The guidance states that "the allocation of proceeds shall be based on the relative fair values of the two instruments at time of issuance. When warrants are issued in conjunction with a debt instrument as consideration in purchase transactions, the amounts attributable to each class of instrument issued shall be determined separately, based on values at the time of issuance. The debt discount or premium shall be determined by comparing the value attributed to the debt instrument with the face amount thereof.

In conjunction with the issuance of Convertible Notes and the Warrants, the Company recorded a debt discount of \$2,857,960 associated with a beneficial conversion feature on the debt, which is being accreted using the effective interest method over the one-year term of the Convertible Notes. Intrinsic value of the beneficial conversion feature was calculated at the commitment date as the difference between the conversion price and the fair value of the common stock into which the security is convertible, multiplied by the number of shares into which the security is convertible. In accordance to ASC 470-20-30, if the intrinsic value of the beneficial conversion feature is greater than the proceeds allocated to the convertible instrument, the amount of the discount assigned to the beneficial conversion feature shall be limited to the amount of the proceeds allocated to the convertible instrument.

The Warrants were indexed to our own stock and no down round provision was identified. The Warrants were not subject to ASC 718. Therefore, the Company concluded that based upon the conversion features, the Warrants should not be accounted for as derivative liabilities. The fair value of the Warrants was \$1,384,530 and was recorded as Debt Discount (with an offset to APIC) on the date of issuance and amortized over the one-year term of the notes.

During the six months ended March 31, 2020, the Company issued 4,114,800 shares of common stock related to the automatic conversion of Convertible Notes and interest from a private placement to accredited investors in 2019. The Convertible Notes and interest were automatically converted to Common Stock at \$1.00 per share on the one year anniversary starting on February 15, 2020.

Debt Offering during the Six Months Ended March 31, 2020

During the six months ended March 31, 2020, the Company closed additional rounds of a debt offering and received gross proceeds of \$715,000 in exchange for issuing Subordinated Convertible Notes and Warrants in a private placement to accredited investors, pursuant to a series of substantially identical Securities Purchase Agreements, Common Stock Warrants, and related documents.

The Convertible Notes are initially convertible into 715,000 shares of Common Stock, subject to certain adjustments, and the Warrants are initially exercisable for 357,500 shares of Common Stock at an exercise price of \$1.20 per share of Common Stock, also subject to certain adjustments.

The fair value of the Warrants issued to debt holders was \$230,955 on the date of issuance and will be amortized over the one-year term of the Convertible Notes.

In connection with the debt offering, the placement agent for the Convertible Notes and the Warrants received a cash fee of \$123,015 and warrants to purchase 94,800 shares of the Company's common stock, all based on 8% of gross proceeds to the Company. The warrants issued for these services had a fair value of \$118,956 at the date of issuance. The fair value of the warrants was recorded as debt discount (with an offset to APIC) and will be amortized over the one-year term of the Convertible Notes. The \$123,015 cash fee was recorded as issuance costs and will be amortized over the one-year term of the related Convertible Notes.

The Company recorded a debt discount of \$105,535 associated with a beneficial conversion feature on the debt, which is being accreted using the effective interest method over the one-year term of the Convertible Notes.

During the six months ended March 31, 2020, amortization related to the 2019 and 2020 debt offerings of \$2,792,398 of the beneficial conversion feature, warrants issued to debt holders and placement agent was recognized as interest expense in the consolidated statements of operations.

Convertible notes payable as of March 31, 2020 and September 30, 2019 are summarized below:

	<u>March 31,</u> <u>2020</u>	<u>September 30,</u> <u>2019</u>
Convertible note- Clayton A. Struve	\$ 1,071,000	\$ 1,071,000
Convertible note- Ronald P. Ericksin	1,184,066	1,184,066
2019 Debt offering	4,242,490	4,242,515
2020 Debt offering	715,000	-
less conversions	(3,809,975)	-
less debt discount - beneficial conversion feature	(316,894)	(1,273,692)
less debt discount - warrants	(169,635)	(616,719)
less debt discount - warrants issued for services related to debt offering	(176,722)	(652,919)
	<u>\$ 2,739,330</u>	<u>\$ 3,954,251</u>

11. EQUITY

Authorized Capital Stock

The Company authorized 105,000,000 shares of capital stock, of which 100,000,000 are shares of voting common stock, par value \$0.001 per share, and 5,000,000 are shares preferred stock, par value \$0.001 per share.

As of March 31, 2020, the Company had 23,324,128 shares of common stock issued and outstanding, held by 135 stockholders of record. The number of stockholders, including beneficial owners holding shares through nominee names, is approximately 2,300. Each share of common stock entitles its holder to one vote on each matter submitted to the stockholders for a vote, and no cumulative voting for directors is permitted. Stockholders do not have any preemptive rights to acquire additional securities issued by the Company. As of March 31, 2020, there were options outstanding for the purchase of 4,891,334 common shares (including unearned stock option grants totaling 2,680,000 shares), warrants for the purchase of 17,755,448 common shares, and 8,108,356 shares of the Company's common stock issuable upon the conversion of Series C and Series D Convertible Preferred Stock. In addition, the Company has 10,167,804 common shares (9,020,264 common shares at the current price of \$0.25 per share and 1,147,540 common shares at the current price of \$1.00 per share) and are issuable upon conversion of convertible debentures of \$3,402,606. All of which could potentially dilute future earnings per share.

Voting Preferred Stock

The Company is authorized to issue up to 5,000,000 shares of preferred stock with a par value of \$0.001.

Series C and D Preferred Stock and Warrants

On August 5, 2016, the Company closed a Series C Preferred Stock and Warrant Purchase Agreement with Clayton A. Struve, an accredited investor for the purchase of \$1,250,000 of preferred stock with a conversion price of \$0.70 per share. The preferred stock has a yield of 8% and an ownership blocker of 4.99%. In addition, Mr. Struve received a five-year warrant to acquire 1,785,714 shares of common stock at \$0.70 per share. On August 14, 2017, the price of the Series C Stock were adjusted to \$0.25 per share pursuant to the documents governing such instruments. On March 31, 2020 and September 30, 2019 there are 1,785,715 Series C Preferred shares outstanding.

As of March 31, 2020, and September 30, 2019, the Company has 1,106,014 of Series D Preferred Stock outstanding with Clayton A. Struve, an accredited investor. On August 14, 2017, the price of the Series D Stock were adjusted to \$0.25 per share pursuant to the documents governing such instruments.

The Series D Preferred Stock is convertible into shares of common stock at a price of \$0.25 per share or by multiplying the number of Series D Preferred Stock shares by the stated value and dividing by the conversion price then in effect, subject to certain diluted events, and has the right to vote the number of shares of common stock the Series D Preferred Stock would be issuable on conversion, subject to a 4.99% blocker. The Preferred Series D has an annual yield of 8%. The Series D Preferred Stock is convertible into shares of common stock at a price of \$0.25 per share or by multiplying the number of Series D Preferred Stock shares by the stated value and dividing by the conversion price then in effect, subject to certain diluted events, and has the right to vote the number of shares of common stock the Series D Preferred Stock would be issuable on conversion, subject to a 4.99% blocker. The Preferred Series D has an annual yield of 8% if and when dividends are declared.

Series F Preferred Stock

On August 1, 2018, the Company filed with the State of Nevada a Certificate of Designation establishing the Designations, Preferences, Limitations and Relative Rights of Series F Preferred Stock. The Designation authorized 500 shares of Series F Preferred Stock. The Series F Preferred Stock shall only be issued to the current Board of Directors on the date of the Designation's filing and is not convertible into common stock. As set forth in the Designation, the Series F Preferred Stock has no rights to dividends or liquidation preference and carries rights to vote 100,000 shares of common stock per share of Series F upon a Trigger Event, as defined in the Designation. A Trigger Event includes certain unsolicited bids, tender offers, proxy contests, and significant share purchases, all as described in the Designation. Unless and until a Trigger Event, the Series F shall have no right to vote. The Series F Preferred Stock shall remain issued and outstanding until the date which is 731 days after the issuance of Series F Preferred Stock ("Explosion Date"), unless a Trigger Event occurs, in which case the Explosion Date shall be extended by 183 days. As of March 31, 2020 and September 30, 2019, there are no Series F shares outstanding.

Securities Subject to Price Adjustments

In the future, if the Company sells its common stock at a price below \$0.25 per share, the exercise price of 8,108,356 outstanding shares of Series C and D Preferred Stock that adjust below \$0.25 per share pursuant to the documents governing such instruments. In addition, the conversion price of a Convertible Note Payable of \$3,402,606 (9,020,264 common shares at the current price of \$0.25 per share and 1,147,540 shares at \$1.00 per share) and the exercise price of additional outstanding warrants to purchase 12,838,286 shares of common stock would adjust below \$0.25 per share pursuant to the documents governing such instruments. Warrants totaling 2,755,717 would adjust below \$1.20 per share pursuant to the documents governing such instruments.

Common Stock

All of the offerings and sales described below were deemed to be exempt under Rule 506 of Regulation D and/or Section 4(a)(2) of the Securities Act. No advertising or general solicitation was employed in offering the securities, the offerings and sales were made to a limited number of persons, all of whom were accredited investors and transfer was restricted by the company in accordance with the requirements of Regulation D and the Securities Act. All issuances to accredited and non-accredited investors were structured to comply with the requirements of the safe harbor afforded by Rule 506 of Regulation D, including limiting the number of non-accredited investors to no more than 35 investors who have sufficient knowledge and experience in financial and business matters to make them capable of evaluating the merits and risks of an investment in our securities.

The following equity issuances occurred during the six months ended March 31, 2020:

On November 9, 2019, a former employee exercised stock option grants on a cashless basis. The former employee received 73,191 shares of common stock for vested stock option grants. The stock option grant had an exercise price of \$0.25 per share. The former employee forfeited stock option grants 226,809 at an exercise price of \$0.25 per share, 150,000 at an exercise price of \$1.28 per share and 130,000 at an exercise price of \$1.50 per share.

On January 1, 2020, the Company issued 540,000 shares of restricted common stock to two Named Executive Officer, three directors and one consultant for services. The shares were issued in accordance with the 2011 Stock Incentive Plan and were valued at \$1.90 per share, the market price of our common stock, or \$1,026,000.

During the six months ended March 31, 2020, the Company issued 4,114,800 shares of common stock related to the automatic conversion of Convertible Notes and interest from a private placement to accredited investors in 2019. The Convertible Notes and interest were automatically converted to Common Stock at \$1.00 per share on the one year anniversary starting on February 15, 2020.

During the six months ended March 31, 2020, the Company issued 229,529 shares of common stock at \$0.979 per share to five investors related to the cashless exercise of warrants.

Warrants to Purchase Common Stock

The following warrant transactions occurred during the six months ended March 31, 2020:

During the six months ended March 31, 2020, the Company issued 229,529 shares of common stock at \$0.979 per share and cancelled warrants to purchase 213,893 shares of common stock at \$1.065 per share to five investors related to the cashless exercise of warrants.

Debt Offering Warrants

The Warrants issued for the 2019 and 2020 Debt Offering were granted on a 1:0.5 basis (one-half Warrant for each full share of Common Stock into which the Convertible Notes are convertible). The Warrants have a five-year term and an exercise price equal to 120% of the per share conversion price of the Qualified Financing or other mandatory conversion.

Warrants issued in connection with 2020 debt offering are initially exercisable for 357,500 shares of Common Stock at an exercise price of \$1.20 per share of Common Stock, also subject to certain adjustments.

In connection with the 2020 debt offering, the placement agent for the Convertible Notes and the Warrants received warrants to 94,800 shares of the Company's common stock, all based on 8% of gross proceeds to the Company.

A summary of the warrants outstanding as of March 31, 2020 were as follows:

	<u>March 31, 2020</u>	
	<u>Shares</u>	<u>Weighted Average Exercise Price</u>
Outstanding at beginning of period	17,747,090	\$ 0.455
Issued	452,300	1.200
Exercised	(229,959)	(0.979)
Forfeited	(213,983)	(1.065)
Expired	-	-
Outstanding at end of period	<u>17,755,448</u>	<u>\$ 0.460</u>
Exercisable at end of period	<u>17,755,448</u>	

The following table summarizes information about warrants outstanding and exercisable as of March 31, 2020:

March 31, 2020					
Number of Warrants	Weighted Average Remaining Life (In Years)	Weighted Average Exercise Price	Shares Exercisable	Weighted Average Exercise Price	
13,333,286	2.53	\$ 0.250	13,333,286	\$ 0.250	
714,286	1.33	0.700	714,286	0.700	
882,158	1.62	1.000	882,158	1.000	
2,805,718	4.04	1.20-1.50	2,805,718	1.20-1.50	
20,000	3.87	2.34-4.08	20,000	2.34-4.08	
<u>17,755,448</u>	<u>3.00</u>	<u>\$ 0.460</u>	<u>17,755,448</u>	<u>\$ 0.460</u>	

The significant weighted average assumptions relating to the valuation of the Company's warrants for the six months ended March 31, 2020 were as follows:

Assumptions	
Dividend yield	0%
Expected life	5 years
Expected volatility	176%-177%
Risk free interest rate	1.51%-1.71%

There were vested and in the money warrants of 14,047,572 as of March 31, 2020 with an aggregate intrinsic value of \$8,809,493.

12. STOCK OPTIONS

On March 21, 2013, an amendment to the Stock Option Plan was approved by the stockholders of the Company, increasing the number of shares reserved for issuance under the Plan to 93,333 shares. On April 10, 2018, the Board approved an amendment to its 2011 Stock Incentive Plan increasing the number of shares of common stock reserved under the Incentive Plan from 93,333 to 1,200,000. On August 7, 2018, the Board approved an amendment to its 2011 Stock Incentive Plan increasing the number of shares of common stock reserved under the Incentive Plan from 1,200,000 to 2,000,000 to common shares. On January 23, 2019, the Board approved an amendment to its 2011 Stock Incentive Plan increasing the number of shares of common stock reserved under the Incentive Plan from 2,200,000 to 2,500,000 to common shares. On May 22, 2019, the Compensation Committee approved an amendment to its 2011 Stock Incentive Plan increasing the number of shares of common stock reserved under the Incentive Plan from 2,500,000 to 3,000,000 to common shares. There were options outstanding for the purchase of 4,891,334 common shares (including unearned stock option grants totaling 2,680,000 shares related to performance targets).

Determining Fair Value under ASC 718

The Company records compensation expense associated with stock options and other equity-based compensation using the Black-Scholes-Merton option valuation model for estimating fair value of stock options granted under our plan. The Company amortizes the fair value of stock options on a ratable basis over the requisite service periods, which are generally the vesting periods. The expected life of awards granted represents the period of time that they are expected to be outstanding. The Company estimates the volatility of our common stock based on the historical volatility of its own common stock over the most recent period corresponding with the estimated expected life of the award. The Company bases the risk-free interest rate used in the Black Scholes-Merton option valuation model on the implied yield currently available on U.S. Treasury zero-coupon issues with an equivalent remaining term equal to the expected life of the award. The Company has not paid any cash dividends on our common stock and does not anticipate paying any cash dividends in the foreseeable future. Consequently, the Company uses an expected dividend yield of zero in the Black-Scholes-Merton option valuation model and adjusts share-based compensation for changes to the estimate of expected equity award forfeitures based on actual forfeiture experience. The effect of adjusting the forfeiture rate is recognized in the period the forfeiture estimate is changed.

Stock Option Activity

The Company had the following stock option transactions during the six months ended March 31, 2020:

During the six months ended March 31, 2020, the Company granted stock option grants to executives, directors and consultants for 3,020,000 shares with an exercise price of \$1.125 per share. The grants expire in five years and generally vest quarterly over four years. Stock option grants totaling 2,680,000 shares of common stock are performance stock option grants and are not vested until the performance is achieved.

During the six months ended March 31, 2020, two executives and three employees voluntarily cancelled stock option grants for 2,588,143 shares with an exercise price of \$2.65 per share.

On November 9, 2019, a former employee exercised stock option grants on a cashless basis. The former employee received 73,191 shares of common stock for vested stock option grants totaling 93,750 shares. The stock option grant had an exercise price of \$0.25 per share. The former employee forfeited stock option grants 226,809 at an exercise price of \$0.25 per share, 150,000 at an exercise price of \$1.28 per share and 130,000 at an exercise price of \$1.50 per share.

There are currently 4,891,334 (including unearned stock option grants totaling 2,680,000 shares related to performance targets) options to purchase common stock at an average exercise price of \$1.165 per share outstanding as of March 31, 2020 under the 2011 Stock Incentive Plan. The Company recorded \$565,726 and \$263,145 of compensation expense, net of related tax effects, relative to stock options for the six months ended March 31, 2020 and 2019 and in accordance with ASC 718. As of March 31, 2020, there is approximately \$614,953, net of forfeitures, of total unrecognized costs related to employee granted stock options that are not vested. These costs are expected to be recognized over a period of approximately 4.19 years.

Stock option activity for the six months ended March 31, 2020 and the years ended September 30, 2019 and 2018 was as follows:

	Options	Weighted Average Exercise Price	\$
Outstanding as of September 30, 2017	15,404	\$ 14.68	\$ 226,059
Granted	2,180,000	1.683	3,668,500
Exercised	-	-	-
Forfeitures	(12,736)	14.764	(188,040)
Outstanding as of September 30, 2018	2,182,668	1.698	3,706,519
Granted	2,870,000	2.615	7,504,850
Exercised	-	-	-
Forfeitures	(520,000)	(3.906)	(2,031,000)
Outstanding as of September 30, 2019	4,532,668	2.025	9,180,369
Granted	3,020,000	1.125	3,397,600
Exercised	(73,191)	(0.250)	(18,298)
Forfeitures	(2,588,143)	(2.650)	(6,859,712)
Outstanding as of March 31, 2020	<u>4,891,334</u>	<u>\$ 1.165</u>	<u>\$ 5,699,959</u>

The following table summarizes information about stock options outstanding and exercisable as of March 31, 2020:

Range of Exercise Prices	Number Outstanding	Weighted Average Remaining Life In Years	Weighted Average Exercise Price Outstanding	Number Exercisable	Weighted Average Exercise Price Exercisable
\$ 0.25	230,000	3.21	\$ 0.250	100,625	\$ 0.250
1.10-1.25	2,940,000	4.60	1.37	233,854	1.096
1.28-1.50	1,610,000	4.60	1.31	498,438	1.296
1.79-2.25	110,000	4.39	1.01	40,000	1.153
13.50-15.00	1,334	0.19	13.50	1,334	13.500
	<u>4,891,334</u>	<u>4.19</u>	<u>\$ 1.165</u>	<u>874,251</u>	<u>\$ 1.212</u>

There were in the money stock option grants of 230,000 shares as of March 31, 2020 with an aggregate intrinsic value of \$149,500.

13. OTHER SIGNIFICANT TRANSACTIONS WITH RELATED PARTIES

Related Party Transactions with Ronald P. Erickson

On January 16, 2018, Mr. Erickson was issued 100,000 of restricted common stock at the grant date market value of \$0.21 per share. On January 2, 2019, Mr. Erickson was issued 100,000 shares of restricted common stock at the grant date market value of \$1.02 per share.

On January 25, 2018, the Company entered into amendments to two demand promissory notes, totaling \$600,000 with Mr. Erickson, our former Chief Executive Officer and current chairman of the board and/or entities in which Mr. Erickson has a beneficial interest. The amendments extend the due date from December 31, 2017 to September 30, 2018 and continue to provide for interest of 3% per annum and a third lien on company assets if not repaid by September 30, 2018 or converted into convertible debentures or equity on terms acceptable to the Holder. On March 16, 2018, the demand promissory notes and accrued interest were converted into convertible notes payable.

On March 16, 2018, the Company entered into a Note and Account Payable Conversion Agreement pursuant to which (a) all \$664,233 currently owing under the J3E2A2Z Notes was converted to a Convertible Redeemable Promissory Note in the principal amount of \$664,233, and (b) all \$519,833 of the J3E2A2Z Account Payable was converted into a Convertible Redeemable Promissory Note in the principal amount of \$519,833 together with a warrant to purchase up to 1,039,666 shares of common stock of the Company for a period of five years. The initial exercise price of the warrants described above is \$0.50 per share, also subject to certain adjustments. The warrants were valued at \$110,545. Because the note is immediately convertible, the warrants and beneficial conversion were expensed as interest. The Company recorded accrued interest of \$73,964 as of September 30, 2019. On May 8, 2019, the Company signed Amendment 1 to the convertible redeemable promissory notes, extending the due dates to September 30, 2019 and increasing the interest rate to 6%. On November 26, 2019, the Company signed Amendment 2 to the convertible promissory or OID notes, extending the due dates to March 31, 2020. On May 11, 2020, the Company signed Amendment 3 to the convertible promissory or OID notes, extending the due dates to September 30, 2020.

On July 9, 2018, the Company repaid a \$199,935 Business Loan Agreement with Umpqua Bank from funds previously provided by an entity affiliated with Ronald P. Erickson, our Chairman of the Board. The Company paid \$27,041 and issued 800,000 shares of common stock in exchange for the conversion of this debt. Mr. Erickson is an accredited investor. These shares were issued in transactions that were not registered under the Act in reliance upon applicable exemptions from registration under Section 4(a)(2) of the Act and/or Rule 506 of SEC Regulation D under the Act.

On October 4, 2019, Ronald P. Erickson voluntarily cancelled a stock option grant for 1,000,000 shares with an exercise price of \$3.03 per share. The grant was related to performance and was not vested.

On November 4, 2019, the Company granted a stock option grant to Ronald P. Erickson for 1,200,000 shares with an exercise price of \$1.10 per share. The performance grant expires November 4, 2024 and vests upon uplisting to the NASDAQ or NYSE exchanges.

On January 1, 2020, the Company issued 100,000 shares of restricted common stock to Ronald P. Erickson. The shares were issued in accordance with the 2011 Stock Incentive Plan and were valued at \$1.90 per share, the market price of the Company's common stock, or \$190,000.

Mr. Erickson and/or entities with which he is affiliated also have accrued compensation, travel and interest of approximately \$613,525 and \$487,932 as of March 31, 2020 and September 30, 2019, respectively.

Related Party Transaction with Phillip A. Bosua

On February 7, 2018, the Company issued 50,000 shares of our common stock to Phillip A. Bosua under the terms of a consulting agreement dated July 6, 2017. The fair value of the shares issued was \$12,000.

On April 10, 2018, the Company issued 2,000,000 shares of our common stock to Phillip A. Bosua under the terms of the Merger Agreement with RAAI common stock. The fair value of the shares issued was \$520,000.

On June 25, 2018, we issued 500,000 shares of our common stock to Phillip A. Bosua under the terms of an Employment agreement dated April 10, 2018. The fair value of the shares issued was \$165,000.

On June 25, 2018, we closed a debt conversion with an entity controlled by Phillip A. Bosua and issued 255,000 shares of common stock in exchange for the conversion of \$63,750 in preexisting debt owed by the Company to this entity.

On July 30, 2018, Mr. Bosua was awarded a stock option grant for 1,000,000 shares of our common stock that was awarded at \$1.28 per share and was valued at the black scholes value of \$0.96 per share.

On October 4, 2019, Philip A. Bosua voluntarily cancelled a stock option grant for 1,000,000 shares with an exercise price of \$3.03 per share. The grants was related to performance and was not vested.

On November 4, 2019, the Company granted a stock option grant to Philip A. Bosua for 1,200,000 shares with an exercise price of \$1.10 per share. The performance grant expires November 4, 2024 and vests upon FDA approval of the UBAND blood glucose monitor.

On January 1, 2020, the Company issued 150,000 shares of restricted common stock to Phillip A. Bosua. The shares were issued in accordance with the 2011 Stock Incentive Plan and were valued at \$1.90 per share, the market price of the Company's common stock, or \$285,000.

Other Stock Option Grants and Cancellations

During January to May 2018, the Company issued 275,000 shares of restricted common stock to one Named Executive Officer and two directors for services during 2018. The shares were issued in accordance with the 2011 Stock Incentive Plan and were valued at \$0.246 per share, the market price of our common stock.

On September 17, 2019, two directors voluntarily forfeited stock option grants for 100,000 shares of common stock with an exercise price of \$3.03 per share.

On November 4, 2019, the Company granted stock option grants to two directors totaling 105,000 shares with an exercise price of \$1.10 per share. The stock option grants expire in five years. The stock option grants vested immediately.

On January 1, 2020, the Company issued 120,000 shares of restricted common stock to three directors. The shares were issued in accordance with the 2011 Stock Incentive Plan and were valued at \$1.90 per share, the market price of the Company's common stock, or \$228,000.

14. COMMITMENTS, CONTINGENCIES AND LEGAL PROCEEDINGS

Legal Proceedings

The Company may from time to time become a party to various legal proceedings arising in the ordinary course of our business. The Company is currently not a party to any pending legal proceeding that is not ordinary routine litigation incidental to our business.

Employment Agreement with Phillip A. Bosua, Chief Executive Officer

On April 10, 2018, the Company appointed Mr. Bosua as Chief Executive Officer of the Company. Previously, Mr. Bosua served as the Company's Chief Product Officer since August 2017. The Company entered into a Consulting Agreement with Mr. Bosua's company, Blaze Clinical on July 7, 2017. From September 2012 to February 2015, Mr. Bosua was the founder and Chief Executive Officer of LIFX Inc. (where he developed and marketed an innovative "smart" light bulb) and from August 2015 until February 2016 was Vice President Consumer Products at Soraa (which markets specialty LED light bulbs). From February 2016 to July 2017, Mr. Bosua was the founder and CEO of RAAI, Inc. (where he continued the development of his smart lighting technology). From May 2008 to February 2013 he was the Founder and CEO of LimeMouse Apps, a leading developer of applications for the Apple App Store.

On April 10, 2018, the Company entered into an Employment Agreement with Mr. Bosua reflecting his appointment as Chief Executive Officer. The Employment Agreement is for an initial term of 12 months (subject to earlier termination) and will be automatically extended for additional 12-month terms unless either party notifies the other party of its intention to terminate the Employment Agreement with at least ninety (90) days prior to the end of the Initial Term or renewal term. Mr. Bosua will be paid a base salary of \$225,000 per year, received 500,000 shares of common stock valued at \$0.33 per share and may be entitled to bonuses and equity awards at the discretion of the Board or a committee of the Board. The Employment Agreement provides for severance pay equal to 12 months of base salary if Mr. Bosua is terminated without "cause" or voluntarily terminates his employment for "good reason." On March 5, 2019, Mr. Bosua's annual compensation was increased to \$240,000.

Employment Agreement with Ronald P. Erickson, Chairman of the Board and Interim Chief Financial Officer

On August 4, 2017, the Board of Directors approved an Employment Agreement with Ronald P. Erickson pursuant to which we engaged Mr. Erickson as our Chief Executive Officer through September 30, 2018. On April 10, 2018, the Company entered into an Amended Employment Agreement for Ronald P. Erickson which amends the Employment Agreement dated July 1, 2017. The Agreement expires March 21, 2019, automatically be extended for additional one (1) year periods unless either Party delivers written notice of such Party's intention to terminate this Agreement at least ninety (90) days prior to the end of the Initial Term or renewal term.

Mr. Erickson's annual compensation was \$180,000. Mr. Erickson is also entitled to receive an annual bonus and equity awards compensation as approved by the Board. The bonus should be paid no later than 30 days following earning of the bonus. On March 5, 2019, Mr. Erickson's annual compensation was increased to \$195,000.

Mr. Erickson will be entitled to participate in all group employment benefits that are offered by us to our senior executives and management employees from time to time, subject to the terms and conditions of such benefit plans, including any eligibility requirements.

If the Company terminates Mr. Erickson's employment at any time prior to the expiration of the Term without Cause, as defined in the Employment Agreement, or if Mr. Erickson terminates his employment at any time for "Good Reason" or due to a "Disability", Mr. Erickson will be entitled to receive (i) his Base Salary amount for one year; and (ii) medical benefits for eighteen months.

Properties and Operating Leases

The Company is obligated under the following leases for its various facilities.

Corporate Offices

On April 13, 2017, the Company leased its executive office located at 500 Union Street, Suite 810, Seattle, Washington, USA, 98101. The Company leases 943 square feet and the net monthly payment is \$2,672. The monthly payment increases approximately 3% each year and the lease expires on May 31, 2022.

Lab Facilities and Executive Offices

On February 1, 2019, the Company leased its lab facilities and executive offices located at 915 E Pine Street, Suite 212, Seattle, WA 98122. The Company leases 2,642 square feet and the net monthly payment is \$8,256. The monthly payment increases approximately 3% on July 1, 2019 and annually thereafter. The lease expires on June 30, 2021 and can be extended.

15. SEGMENT REPORTING

The management of the Company considers the business to have two operating segments (i) the development of theBio-RFID™ and "ChromaID™" technologies and (ii) TransTech, a distributor of products for employee and personnel identification and authentication. TransTech has historically provided substantially all of the Company's revenues. The financial results from our TransTech subsidiary have been diminishing as vendors of their products increasingly move to the Internet and direct sales to their customers. While it does provide our current revenues, it is not central to our current focus as a Company. Moreover, we have written down any goodwill associated with its historic acquisition. We continue to closely monitor this subsidiary and expect it to wind down completely in the near future.

The reporting for the three and six months ended March 31, 2020 and 2019 was as follows (in thousands):

Segment	Revenue	Gross Margin	Segment Net Profit (Loss)	Segment Assets
Three Months Ended March 31, 2020				
Development of the Bio-RFID™ and “ChromaID™” technologies	\$ -	\$ -	\$ (3,346)	\$ 1,224
TransTech distribution business	5	1	15	4
Total segments	\$ 5	\$ 1	\$ (3,331)	\$ 1,228
Three Months Ended March 31, 2019				
Development of the Bio-RFID™ and “ChromaID™” technologies	\$ -	\$ -	\$ (1,434)	\$ 3,565
TransTech distribution business	594	139	(8)	379
Total segments	\$ 594	\$ 139	\$ (1,442)	\$ 3,944
Six Months Ended March 31, 2020				
Development of the Bio-RFID™ and “ChromaID™” technologies	\$ -	\$ -	\$ (6,418)	\$ 1,224
TransTech distribution business	122	52	72	4
Total segments	\$ 122	\$ 52	\$ (6,346)	\$ 1,228
Six Months Ended March 31, 2019				
Development of the Bio-RFID™ and “ChromaID™” technologies	\$ -	\$ -	\$ (2,171)	\$ 3,565
TransTech distribution business	1,196	269	(40)	379
Total segments	\$ 1,196	\$ 269	\$ (2,211)	\$ 3,944

During the six months ended March 31, 2020, the segment development of Bio-RFID™ and “ChromaID™” incurred non-cash expenses of \$4,510,430.

16. SUBSEQUENT EVENTS

The Company evaluated subsequent events, for the purpose of adjustment or disclosure, up through the date the financial statements were issued. Subsequent to March 31, 2020, there were the following material transactions that require disclosure:

The Company closed additional rounds of a debt offering and received gross proceeds of \$1,979,500 in exchange for issuing Subordinated Convertible Notes and Warrants in a private placement to accredited investors, pursuant to a series of substantially identical Securities Purchase Agreements, Common Stock Warrants, and related documents. The Convertible Notes are initially convertible into 1,979,500 shares of Common Stock, subject to certain adjustments, and the Warrants are initially exercisable for 989,750 shares of Common Stock at an exercise price of \$1.20 per share of Common Stock, also subject to certain adjustments. In connection with the debt offering, the placement agent for the Convertible Notes and the Warrants received a cash fee of \$158,360 and warrants to purchase 237,540 shares of the Company's common stock, all based on 8% of gross proceeds to the Company.

The Company issued 305,117 shares of common stock related to the automatic conversion of Convertible Notes and interest from a private placement to accredited investors in 2019. The Convertible Notes and interest were automatically converted to Common Stock at \$1.00 per share on the one year anniversary starting on February 15, 2020.

On April 29, 2020, the Company increased the salary of Ronald P. Erickson and Phillip A. Bosua by \$20,000 per year.

On April 30, 2020, the Company received \$226,170 under the Paycheck Protection Program of the U.S. Small Business Administration's 7(a) Loan Program pursuant to the Coronavirus, Aid, Relief and Economic Security Act (CARES Act), Pub. Law 116-136, 134 Stat. 281 (2020).

On April 30, 2020, the Company approved and ratified the incorporation of Particle, Inc., a Nevada corporation ("Particle"). The Company is the sole shareholder as of the date of incorporation. As a result, Particle is a direct, wholly owned subsidiary of the Company. Particle shall utilize the same corporate offices as the Company and shall focus on the development and commercialization of the Company's extensive intellectual property relating to electromagnetic energy outside of the medical diagnostic arena which remains the parent company's singular focus with its initial product, the UBAND™ non-invasive continuous glucose monitor.

On May 11, 2020, the Company signed Amendment 3 to the convertible promissory or OID notes with Ronald P. Erickson and J3E2A2Z, extending the due dates to September 30, 2020.

On May 11, 2020, the Company signed Amendments to the convertible promissory or OID notes with Clayton A. Struve, extending the due dates to September 30, 2020.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Forward-looking statements in this report reflect the good-faith judgment of our management and the statements are based on facts and factors as we currently know them. Forward-looking statements are subject to risks and uncertainties and actual results and outcomes may differ materially from the results and outcomes discussed in the forward-looking statements. Factors that could cause or contribute to such differences in results and outcomes include, but are not limited to, those discussed below as well as those discussed elsewhere in this report (including in Part II, Item 1A (Risk Factors)). Readers are urged not to place undue reliance on these forward-looking statements because they speak only as of the date of this report. We undertake no obligation to revise or update any forward-looking statements in order to reflect any event or circumstance that may arise after the date of this report.

BACKGROUND AND CAPITAL STRUCTURE

Know Labs, Inc. was incorporated under the laws of the State of Nevada in 1998. Since 2007, we have been focused primarily on research and development of proprietary technologies which can be used to authenticate and diagnose a wide variety of organic and non-organic substances and materials. Our Common Stock trades on the OTCQB Exchange under the symbol "KNWN."

BUSINESS

We are focused on the development, marketing and sales of proprietary technologies which are capable of uniquely identifying or authenticating almost any substance or material using electromagnetic energy to record, detect, and identify the unique "signature" of the substance or material. We call these our "Bio-RFID™" and "ChromaID™" technologies.

Historically, the Company focused on the development of our proprietary ChromaID technology. Using light from low-cost LEDs (light emitting diodes) the ChromaID technology maps the color of substances, fluids and materials. With our proprietary processes we can authenticate and identify based upon the color that is present. The color is both visible to us as humans but also outside of the humanly visible color spectrum in the near infra-red and near ultra-violet and beyond. The Company's ChromaID scanner sees what we like to call "Nature's Color Fingerprint." Everything in nature has a unique color identifier and with ChromaID the Company can see, and identify, and authenticate based upon the color that is present. The Company's ChromaID scanner is capable of uniquely identifying and authenticating almost any substance or liquid using light to record, detect and identify its unique color signature. More recently, the Company has focused upon extensions and new inventions that are derived from and extend beyond our ChromaID technology. The Company calls this new technology "Bio-RFID." The rapid advances made with our Bio-RFID technology in our laboratory have caused us to move quickly into the commercialization phase of our Company as we work to create revenue generating products for the marketplace. Today, the sole focus of the Company is on its Bio-RFID technology and its commercialization.

In 2010, we acquired TransTech Systems, Inc. as an adjunct to our business. TransTech is a distributor of products for employee and personnel identification and authentication. TransTech has historically provided substantially all of the Company's revenues. The financial results from our TransTech subsidiary have been diminishing as vendors of their products increasingly move to the Internet and direct sales to their customers. While it does provide our current revenues, it is not central to our current focus as a Company. Moreover, we have written down any goodwill associated with its historic acquisition. We expect to shut down TransTech completely by June 30, 2020.

The Know Labs Technology

We have internally and under contract with third parties developed proprietary platform technologies to uniquely identify or authenticate almost any material and substance. Our technology utilizes electromagnetic energy along the electromagnetic spectrum to perform analytics which allow the user to identify and authenticate substances and materials depending upon the user's unique application and field of use. The Company's proprietary platform technologies are called Bio-RFID and ChromaID.

The Company's latest technology platform is called Bio-RFID. Working in our lab over the last two years, we have developed extensions and new inventions derived in part from our ChromaID technology which we refer to as Bio-RFID technology. We are rapidly advancing the development of this technology. We have announced over the past year that we have successfully been able to non-invasively ascertain blood glucose levels in humans. We are building the internal and external development team necessary to commercialize this newly discovered technology as well as make additional patent filings covering the intellectual property created with these new inventions. The first applications of our Bio-RFID technology will be in a product we call the UBAND™. The first UBAND product will be marketed as a Continuous Glucose Monitor. It is a wearable product which will be worn on the wrist or ankle and communicate with a smart phone device via Bluetooth connectivity. It will provide the user with real time information on their blood glucose levels. This initial product will require US Food and Drug Administration approval prior to its introduction to the market.

We have also announced the results of laboratory-based comparison testing between our Bio-RFID technology and the leading continuous glucose monitors from Abbott Labs (Freestyle Libre®) and DexCom (G5®). These results provide evidence of a high degree of correlation between our Bio-RFID based technology and the current industry leaders and their continuous glucose monitors. Our technology is fundamentally differentiated from these industry leaders as our UBAND continuous glucose monitor is completely non-invasive.

We expect to begin the process of obtaining US Food and Drug Administration (FDA) approval of our non-invasive continuous blood glucose monitoring device during calendar year 2020. To guide us in that undertaking we previously announced the hiring of a Chief Medical Officer and formed a Medical and Regulatory Advisory Board to guide us through the FDA process. We are unable, however, to estimate the time necessary for such approval nor the likelihood of success in that endeavor.

Our ChromaID patented technology utilizes light at the photon (elementary particle of light) level through a series of emitters and detectors to generate a unique signature or “fingerprint” from a scan of almost any solid, liquid or gaseous material. This signature of reflected or transmitted light is digitized, creating a unique ChromaID signature. Each ChromaID signature is comprised of from hundreds to thousands of specific data points.

The ChromaID technology looks beyond visible light frequencies to areas of near infra-red and ultraviolet light and beyond that are outside the humanly visible light spectrum. The data obtained allows us to create a very specific and unique ChromaID signature of the substance for a myriad of authentication, verification and identification applications.

Traditional light-based identification technology, called spectrophotometry, has relied upon a complex system of prisms, mirrors and visible light. Spectrophotometers typically have a higher cost and utilize a form factor (shape and size) more suited to a laboratory setting and require trained laboratory personnel to interpret the information. The ChromaID technology uses lower cost LEDs and photodiodes and specific electromagnetic frequencies resulting in a more accurate, portable and easy-to-use solution for a wide variety of applications. The ChromaID technology not only has significant cost advantages as compared to spectrophotometry, it is also completely flexible in size, shape and configuration. The ChromaID scan head can range in size from endoscopic to a scale that could be the size of a large ceiling-mounted florescent light fixture.

In normal operation, a ChromaID master or reference scan is generated and stored in a database. We call this the ChromaID Reference Data Library. The scan head can then scan similar materials to identify, authenticate or diagnose them by comparing the new ChromaID digital signature scan to that of the original or reference ChromaID signature or scan result. Over time, we believe the ChromaID Reference Libraries can become a significant asset of the Company, providing valuable information in numerous fields of use. The Reference Data Libraries for our newly developed Bio-RFID will have a similar promise regarding their utility and value.

Bio-RFID and ChromaID: Foundational Platform Technologies

Our Bio-RFID and ChromaID technologies provide a platform upon which a myriad of applications can be developed. As platform technologies, they are analogous to a smartphone, upon which an enormous number of previously unforeseen applications have been developed. Bio-RFID and ChromaID technologies are “enabling” technologies that bring the science of electromagnetic energy to low-cost, real-world commercialization opportunities across multiple industries. The technologies are foundational and, as such, the basis upon which the Company believes significant businesses can be built.

As with other foundational technologies, a single application may reach across multiple industries. The Bio-RFID technology can non-invasively identify the presence and quantity of glucose in the human body. By extension, there may be other molecular structures which this same technology can identify in the human body which, over time, the Company will focus upon. They may include the monitoring of drug usage or the presence of illicit drugs. They may also involve identifying hormones and various markers of disease.

Similarly, the ChromaID technology can, for example effectively differentiate and identify different brands of clear vodkas that appear identical to the human eye. By extension, this same technology could identify pure water from water with contaminants present. It could provide real time detection of liquid medicines such as morphine that have been adulterated or compromised. It could detect if jet fuel has water contamination present. It could determine when it is time to change oil in a deep fat fryer. These are but a few of the potential applications of the ChromaID technology based upon extensions of its ability to identify different liquids.

The cornerstone of a company with a foundational platform technology is its intellectual property. We have pursued an active intellectual property strategy and have been granted 13 patents. We currently have a number of patents pending and continue, on a regular basis the filing of new patents. We possess all right, title and interest to the issued patents. Nine issued and pending patents are licensed exclusively to us in perpetuity by our strategic partner, Allied Inventors, a spin-off entity of Intellectual Ventures, an intellectual property fund.

Our Patents and Intellectual Property

We believe that our 14 patents, patent applications, registered trademarks, and our trade secrets, copyrights and other intellectual property rights are important assets. Our issued patents will expire at various times between 2027 and 2039. Pending patents, if and when issued, may have expiration dates that extend further in time. The duration of our trademark registrations varies from country to country. However, trademarks are generally valid and may be renewed indefinitely as long as they are in use and/or their registrations are properly maintained.

The issued patents cover the fundamental aspects of the Know Labs ChromaID technology and a number of unique applications. We have filed patents on the fundamental aspects of our Bio-RFID technology and growing number of unique applications. We will continue to expand the Company’s patent portfolio.

Additionally, significant aspects of our technology are maintained as trade secrets which may not be disclosed through the patent filing process. We intend to be diligent in maintaining and securing our trade secrets.

The patents that have been issued to Know Labs and their dates of issuance are:

On August 9, 2011, we were issued US Patent No. 7,996,173 B2 entitled “Method, Apparatus and Article to Facilitate Distributed Evaluation of Objects Using Electromagnetic Energy,” by the United States Office of Patents and Trademarks. The patent expires August 24, 2029.

On December 13, 2011, we were issued US Patent No. 8,076,630 B2 entitled “System and Method of Evaluating an Object Using Electromagnetic Energy” by the United States Office of Patents and Trademarks. The patent expires November 7, 2028.

On December 20, 2011, we were issued US Patent No. 8,081,304 B2 entitled “Method, Apparatus and Article to Facilitate Evaluation of Objects Using Electromagnetic Energy” by the United States Office of Patents and Trademarks. The patent expires July 28, 2030.

On October 9, 2012, we were issued US Patent No. 8,285,510 B2 entitled “Method, Apparatus, and Article to Facilitate Distributed Evaluation of Objects Using Electromagnetic Energy” by the United States Office of Patents and Trademarks. The patent expires July 31, 2027.

On February 5, 2013, we were issued US Patent No. 8,368,878 B2 entitled “Method, Apparatus and Article to Facilitate Evaluation of Objects Using Electromagnetic Energy by the United States Office of Patents and Trademarks. The patent expires July 31, 2027.

On November 12, 2013, we were issued US Patent No. 8,583,394 B2 entitled “Method, Apparatus and Article to Facilitate Distributed Evaluation of Objects Using Electromagnetic Energy by the United States Office of Patents and Trademarks. The patent expires July 31, 2027.

On November 21, 2014, we were issued US Patent No. 8,888,207 B2 entitled “Systems, Methods, and Articles Related to Machine-Readable Indicia and Symbols” by the United States Office of Patents and Trademarks. The patent expires February 7, 2033. This patent describes using ChromaID to see what we call invisible bar codes and other identifiers.

On March 23, 2015, we were issued US Patent No. 8,988,666 B2 entitled “Method, Apparatus, and Article to Facilitate Evaluation of Objects Using Electromagnetic Energy” by the United States Office of Patents and Trademarks. The patent expires July 31, 2027.

On May 26, 2015, we were issued US Patent No. 9,041,920 B2 entitled “Device for Evaluation of Fluids using Electromagnetic Energy” by the United States Office of Patents and Trademarks. The patent expires March 12, 2033. This patent describes a ChromaID fluid sampling devices.

On April 19, 2016, we were issued US Patent No. 9,316,581 B2 entitled “Method, Apparatus, and Article to Facilitate Evaluation of Substances Using Electromagnetic Energy” by the United States Office of Patents and Trademarks. The patent expires March 12, 2033. This patent describes an enhancement to the foundational ChromaID technology.

On April 18, 2017, we were issued US Patent No. 9,625,371 B2 entitled “Method, Apparatus, and Article to Facilitate Evaluation of Substances Using Electromagnetic Energy.” The patent expires July 2027. This patent pertains to the use of ChromaID technology for the identification and analysis of biological tissue. It has many potential applications in medical, industrial and consumer markets.

On May 30, 2017, we were issued US Patent No. 9,664,610 B2 entitled “Systems for Fluid Analysis Using Electromagnetic Energy that is reflected a Number of Times through a Fluid Contained within a Reflective Chamber.” This patent expires approximately in approximately March 2034. This patent pertains to a method for the use of the Company’s technology analyzing fluids.

On April 4, 2018, we were issued US Patent No. 9,869,636 B2, entitled “Device for Evaluation of Fluids Using Electromagnetic Energy.” The patent expires in approximately April 2033. This patent pertains to the use of ChromaID technology for evaluating and analyzing fluids such as those following through an IV drip in a hospital or water, for example.

On February 4, 2020, we were issued US Patent No. 10,548,503 B2, entitled “Health Related Diagnostics Employing Spectroscopy in Radio/Microwave Frequency Band. The patent expires in approximately May 2039. This patent pertains to the use of Bio-RFID technology for medical diagnostics.

We continue to pursue a patent strategy to expand our unique intellectual property in the United States and other countries.

Product Strategy

We are currently undertaking internal development work on potential products for the consumer marketplace. We have announced the development of our UBAND continuous glucose monitor and our desire to obtain US Food and Drug Administration approval for the marketing of this product to the diabetic and pre-diabetic population. We have also announced the engagement of a manufacturing partner we will work with to bring this product to market. We will make further announcements regarding this product as development, manufacturing and regulatory approval work progresses.

Currently we are focusing our efforts on productizing our Bio-RFID technology as we move it out of our research laboratory and into the marketplace.

Research and Development

Our current research and development efforts are primarily focused on improving our Bio-RFID technology, extending its capacity and developing new and unique applications for this technology. As part of this effort, we conduct on-going laboratory testing to ensure that application methods are compatible with the end-user and regulatory requirements, and that they can be implemented in a cost-effective manner. We are also actively involved in identifying new applications. Our current internal team along with outside consultants have considerable experience working with the application of our technologies and their application. We engage third party experts as required to supplement our internal team. We believe that continued development of new and enhanced technologies is essential to our future success. We incurred expenses of \$938,303 and \$391,014 for the six months ended March 31, 2020 and 2019, respectively, on development activities.

Merger with RAAI Lighting, Inc.

On April 10, 2018, we entered into an Agreement and Plan of Merger with 500 Union Corporation, a Delaware corporation and a wholly owned subsidiary of the Company, and RAAI Lighting, Inc., a Delaware corporation. Pursuant to the Merger Agreement, we have acquired all the outstanding shares of RAAI's capital stock through a merger of Merger Sub with and into RAAI (the "Merger"), with RAAI surviving the Merger as a wholly owned subsidiary of the Company.

Under the terms of the Merger Agreement, each share of RAAI common stock issued and outstanding immediately before the Merger (1,000 shares) were cancelled and we issued 2,000,000 shares of our common stock. As a result, we issued 2,000,000 shares of its common stock to Phillip A. Bosua, formerly the sole stockholder of RAAI. The consideration for the Merger was determined through arms-length bargaining by the Company and RAAI. The Merger was structured to qualify as a tax-free reorganization for U.S. federal income tax purposes. As a result of the Merger, the Company received certain intellectual property, related to RAAI.

Merger with Know Labs, Inc.

On May 1, 2018, Know Labs, Inc., a Nevada corporation incorporated on April 3, 2018, and our wholly-owned subsidiary, merged with and into the Company pursuant to an Agreement and Plan of Merger dated May 1, 2018. In connection with the merger, our Articles of Incorporation were effectively amended to change our name to Know Labs, Inc. by and through the filing of Articles of Merger. This parent-subsiidiary merger was approved by us, the parent, in accordance with Nevada Revised Statutes Section 92A.180. Stockholder approval was not required. This amendment was filed with the Nevada Secretary of State and became effective on May 1, 2018.

EMPLOYEES

As of March 31, 2020, we had six full-time employees, including one employee at TransTech. Our senior management and five other personnel are located in our Seattle, Washington offices. We also utilize consulting firms and people to supplement our workforce.

THE COMPANY'S COMMON STOCK

Our common stock trades on the OTCQB Exchange under the symbol "KNWN." On May 1, 2018, we filed a corporate action with FINRA to effectively change the Company's OTC trading symbol and change our name to "Know Labs, Inc." Our name change from Know Labs, Incorporated to Know Labs, Inc. and symbol change from VSUL to KNWN was announced by FINRA declared effective on the opening of trading as of May 25, 2018.

PRIMARY RISKS AND UNCERTAINTIES

We are exposed to various risks related to our need for additional financing, the sale of significant numbers of our shares and a volatile market price for our common stock. These risks and uncertainties are discussed in more detail below in Part I, Item 1A.

CORPORATE INFORMATION

We were incorporated under the laws of the State of Nevada on October 8, 1998. Our executive offices are located at 500 Union Street, Suite 810, Seattle, WA 98101. Our telephone number is (206) 903-1351 and its principal website address is located at www.knowlabs.co. The information on our website is not incorporated as a part of this Form 10-K.

WEBSITE ACCESS TO UNITED STATES SECURITIES AND EXCHANGE COMMISSION REPORTS

We file annual and quarterly reports, proxy statements and other information with the Securities and Exchange Commission ("SEC"). You may read and copy any document we file at the SEC's Public Reference Room at 100 F Street, N.E., Washington D.C. 20549. Please call the SEC at 1-800-SEC-0330 for further information on the public reference room. The SEC maintains a website at <http://www.sec.gov> that contains reports, proxy and information statements and other information concerning filers. We also maintain a web site at <http://www.knowlabs.co> that provides additional information about our Company and links to documents we file with the SEC. The Company's charters for the Audit Committee, the Compensation Committee, and the Nominating Committee; and the Code of Conduct & Ethics are also available on our website. The information on our website is not part of this Form 10-K.

RESULTS OF OPERATIONS

In 2010, we acquired TransTech Systems, Inc. as an adjunct to our business. TransTech is a distributor of products for employee and personnel identification and authentication. TransTech has historically provided substantially all of our revenues. The financial results from our TransTech subsidiary have been diminishing as vendors of their products increasingly move to the Internet and direct sales to their customers. While it does provide our current revenues it is not central to our current focus. Moreover, we have written down any goodwill associated with its historic acquisition. We expect to shut down TransTech completely by June 30, 2020.

The following table presents certain consolidated statement of operations information and presentation of that data as a percentage of change from period-to-period.

(dollars in thousands)

	Three Months Ended March 31,			
	2020	2019	\$ Variance	% Variance
Revenue	\$ 5	\$ 594	\$ (589)	-99.2%
Cost of sales	4	455	(451)	99.1%
Gross profit	1	139	(138)	-99.3%
Research and development expenses	447	184	263	-142.9%
Selling, general and administrative expenses	1,623	1,004	619	-61.7%
Operating loss	(2,069)	(1,049)	(1,020)	-105.3%
Other (expense) income:				
Interest expense	(1,302)	(400)	(902)	-225.5%
Other income (expense)	40	7	33	471.4%
Total other income (expense)	(1,262)	(393)	(869)	-221.1%
(Loss) before income taxes	(3,331)	(1,442)	(1,889)	-131.0%
Income taxes - current (benefit)	-	-	-	0.0%
Net (loss)	<u>\$ (3,331)</u>	<u>\$ (1,442)</u>	<u>\$ (1,889)</u>	<u>-131.0%</u>

THREE MONTHS ENDED MARCH 31, 2020 COMPARED TO THE THREE MONTHS ENDED MARCH 31, 2019

Sales

Revenue for the three months ended March 31, 2020 decreased \$589,000 to \$5,000 as compared to \$594,000 for the three months ended March 31, 2019. The decrease was due to lower sales by TransTech as we wind down TransTech. We expect to shut down TransTech completely by June 30, 2020.

Cost of Sales

Cost of sales for the three months ended March 31, 2020 decreased \$451,000 to \$4,000 as compared to \$455,000 for the three months ended March 31, 2019. The decrease was due to lower sales by TransTech as we wind down TransTech. We expect to shut down TransTech completely by June 30, 2020.

Gross profit was \$1,000 for the three months ended March 31, 2020 as compared to \$139,000 for the three months ended March 31, 2019. Gross profit was 16.6% for the three months ended March 31, 2020 as compared to 22.5% for the three months ended March 31, 2019. We have focused TransTech on maximizing profits at the current sales level.

Research and Development Expenses

Research and development expenses for the three months ended March 31, 2020 increased \$263,000 to \$447,000 as compared to \$184,000 for the three months ended March 31, 2019. The increase was due to the hiring of additional personnel, the use of consultant and expenditures related to the development of our Bio-RFID™ technology, continuing our effort with obtaining FDA approval.

Selling, General and Administrative Expenses

Selling, general and administrative expenses for the three months ended March 31, 2020 increased \$619,000 to \$1,623,000 as compared to \$1,004,000 for the three months ended March 31, 2019.

The increase primarily was due to (i) increased professional fees of \$9,000; (ii) increased stock based compensation of \$677,000; and (iii) increased payroll of \$12,000; offset by (iv) decreased TransTech expenses of \$119,000 (primarily salaries and rent); and (v) decreased other expenses of \$40,000. As part of the selling, general and administrative expenses for the three months ended March 31, 2020, we recorded \$43,000 of investor relation expenses and business development expenses.

Other (Expense), Net

Other expense, net for the three months ended March 31, 2020 was \$1,262,000 as compared to other expense, net of \$393,000 for the three months ended March 31, 2019. The other expense, net for the three months ended March 31, 2020 included (i) interest expense of \$1,302,000; offset by (ii) other income of \$40,000.

The other expense, net for the three months ended March 31, 2019 included (i) interest expense of \$400,000; offset by (ii) other income of \$7,000.

Net Loss

Net loss for the three months ended March 31, 2020 was \$3,331,000 as compared to \$1,442,000 for the three months ended March 31, 2019. The net loss for the three months ended March 31, 2020 included non-cash items of \$2,442,000. The non-cash items include (i) depreciation and amortization of \$61,000; (ii) stock based compensation of \$166,000; (iii) issuance of capital stock for services and expenses of \$1,026,000; (iv) amortization of debt discount as interest expense of \$1,225,000; offset by (v) other of \$36,000. TransTech's net loss from operations was \$25,000 for the three months ended March 31, 2020.

The net loss for the three months ended March 31, 2019, included non-cash expenses of \$911,000. The non-cash items include (i) depreciation and amortization of \$71,000; (ii) stock based compensation of \$91,000; (iii) issuance of capital stock for services and expenses of \$349,000; (iv) amortization of debt discount as interest expense of \$362,000; and (v) other of \$38,000. TransTech's net loss from operations was \$7,000 for the three months ended March 31, 2019.

We expect losses to continue as we commercialize our ChromaID™ and Bio-RFID™ technology.

	Six Months Ended March 31,			
	2020	2019	\$ Variance	% Variance
Revenue	\$ 122	\$ 1,196	\$ (1,074)	-89.8%
Cost of sales	70	927	(857)	92.4%

SIX MONTHS ENDED MARCH 31, 2020 COMPARED TO THE SIX MONTHS ENDED MARCH 31, 2019

Sales

Revenue for the six months ended March 31, 2020 decreased \$1,074,000 to \$122,000 as compared to \$1,196,000 for the six months ended March 31, 2019. The decrease was due to lower sales by TransTech as we wind down TransTech. We expect to shut down TransTech completely by June 30, 2020.

Cost of Sales

Cost of sales for the six months ended March 31, 2020 decreased \$857,000 to \$70,000 as compared to \$927,000 for the six months ended March 31, 2019. The decrease was due to lower sales by TransTech as we wind down TransTech. We expect to shut down TransTech completely by June 30, 2020.

Gross profit was \$52,000 for the six months ended March 31, 2020 as compared to \$269,000 for the six months ended March 31, 2019. Gross profit was 20.2% for the six months ended March 31, 2020 as compared to 23.4% for the six months ended March 31, 2019. We have focused TransTech on maximizing profits at the current sales level.

Research and Development Expenses

Research and development expenses for the six months ended March 31, 2020 increased \$547,000 to \$938,000 as compared to \$391,000 for the six months ended March 31, 2019. The increase was due to the hiring of additional personnel, the use of consultant and expenditures related to the development of our Bio-RFID™ technology, including obtaining FDA approval.

Selling, General and Administrative Expenses

Selling, general and administrative expenses for the six months ended March 31, 2020 increased \$850,000 to \$2,543,000 as compared to \$1,693,000 for the six months ended March 31, 2019.

The increase primarily was due to (i) increased professional fees of \$116,000; (ii) increased stock based compensation of \$949,000; (iii) increased insurance of \$23,000; (iv) increased payroll of \$17,000; (v) increased other expenses of \$20,000; offset by (iv) decreased TransTech expenses of \$258,000 (primarily salaries and rent). As part of the selling, general and administrative expenses for the six months ended March 31, 2020, we recorded \$83,000 of investor relation expenses and business development expenses.

Other (Expense), Net

Other expense, net for the six months ended March 31, 2020 was \$2,917,000 as compared to other expense, net of \$396,000 for the six months ended March 31, 2019. The other expense for the six months ended March 31, 2020 included (i) interest expense of \$2,981,000; offset by (ii) other income of \$64,000.

The other expense, net for the six months ended March 31, 2019 included (i) interest expense of \$409,000; offset by (ii) other income of \$13,000.

Net Loss

Net loss for the six months ended March 31, 2020 was \$6,346,000 as compared to \$2,211,000 for the six months ended March 31, 2019. The net loss for the six months ended March 31, 2020 included non-cash items of non-cash expenses of \$4,510,000. The non-cash items include (i) depreciation and amortization of \$121,000; (ii) issuance of capital stock for services and expenses of \$1,026,000; (iii) stock based compensation of \$566,000; (iv) amortization of debt discount as interest expense of \$2,792,000; and (v) other of \$5,000. TransTech's net income from operations was \$68,000 for the six months ended March 31, 2020.

The net loss for the six months ended March 31, 2019, included non-cash expenses of \$1,146,000. The non-cash items included (i) depreciation and amortization of \$133,000; (ii) stock based compensation of \$293,000; (iii) issuance of capital stock for services and expenses of \$349,000; (iv) amortization of debt discount as interest expense of \$362,000; and (v) other of \$9,000. TransTech's net loss from operations was \$36,000 for the six months ended March 31, 2019.

We expect losses to continue as we commercialize our ChromaID™ and Bio-RFID™ technology.

LIQUIDITY AND CAPITAL RESOURCES

Liquidity is the ability of a company to generate funds to support its current and future operations, satisfy its obligations, and otherwise operate on an ongoing basis. Significant factors in the management of liquidity are funds generated by operations, levels of accounts receivable and accounts payable and capital expenditures.

We had cash of approximately \$777,000 and a net working capital deficit of approximately \$722,000 (net of convertible notes payable and right of use asset and liabilities) as of March 31, 2020. We have experienced net losses since inception and we expect losses to continue as we commercialize our ChromaID™ technology. As of March 31, 2020, we had an accumulated deficit of \$48,749,000 and net losses in the amount of \$6,346,000, \$7,612,000 and \$3,258,000 for the six months ended March 31, 2020 and the year ended September 30, 2019 and 2018, respectively. We believe that our cash on hand including funding closed since March 31, 2020 will be sufficient to fund our operations through early 2021. During the six months ended March 31, 2020, the Company incurred non-cash expenses of \$4,510,000.

During April 2020, we closed additional rounds of a debt offering and received gross proceeds of \$1,979,500 in exchange for issuing Subordinated Convertible Notes and Warrants in a private placement to accredited investors, pursuant to a series of substantially identical Securities Purchase Agreements, Common Stock Warrants, and related documents. The Convertible Notes are initially convertible into 1,979,500 shares of Common Stock, subject to certain adjustments, and the Warrants are initially exercisable for 989,750 shares of Common Stock at an exercise price of \$1.20 per share of Common Stock, also subject to certain adjustments. In connection with the debt offering, the placement agent for the Convertible Notes and the Warrants received a cash fee of \$193,662 and warrants to purchase 237,540 shares of the Company's common stock, all based on 8% of gross proceeds to the Company.

The opinion of our independent registered public accounting firm on our audited financial statements as of and for the year ended September 30, 2019 contains an explanatory paragraph regarding substantial doubt about our ability to continue as a going concern. Our ability to continue as a going concern is dependent upon raising capital from financing transactions.

We need additional financing to implement our business plan and to service our ongoing operations and pay our current debts. There can be no assurance that we will be able to secure any needed funding, or that if such funding is available, the terms or conditions would be acceptable to us. If we are unable to obtain additional financing when it is needed, we will need to restructure our operations, and divest all or a portion of our business. We may seek additional capital through a combination of private and public equity offerings, debt financings and strategic collaborations. Debt financing, if obtained, may involve agreements that include covenants limiting or restricting our ability to take specific actions, such as incurring additional debt, and could increase our expenses and require that our assets secure such debt. Equity financing, if obtained, could result in dilution to our then-existing stockholders and/or require such stockholders to waive certain rights and preferences. If such financing is not available on satisfactory terms, or is not available at all, we may be required to delay, scale back, or eliminate the development of business opportunities and our operations and financial condition may be materially adversely affected.

We have financed our corporate operations and our technology development through the issuance of convertible debentures, the issuance of preferred stock, the sale of common stock and the exercise of warrants.

The proceeds of warrants which are not expected to be cashless are expected to generate potential proceeds of up to \$6,045,000.

Operating Activities

Net cash used in operating activities for the six months ended March 31, 2020 was \$1,688,000. This amount was primarily related to (i) a net loss of \$6,346,000; offset by (ii) working capital changes of \$148,000; and (iii) non-cash expenses of \$4,510,000. The non-cash items include (iv) depreciation and amortization of \$121,000; (v) issuance of capital stock for services and expenses of \$1,026,000; (vi) stock based compensation of \$566,000; (vii) amortization of debt discount as interest expense of \$2,792,000; and (viii) other of \$5,000.

Investing Activities

Net cash used in investing activities for the six months ended March 31, 2020 and 2019 was \$28,000 and \$75,000. This amount was primarily related to the investment in equipment for research and development.

Financing Activities

Net cash provided by financing activities for the six months ended March 31, 2020 and 2019 was \$592,000 and \$3,810,000. These amounts was primarily related to issuance of convertible notes payable of offset by payments of issuance costs from notes payable.

Our contractual cash obligations as of March 31, 2020 are summarized in the table below:

Contractual Cash Obligations (1)	Total	Less Than 1 Year	1-3 Years	3-5 Years	Greater Than 5 Years
Operating leases	\$ 209,957	\$ 133,996	\$ 75,961	\$ -	\$ -
Convertible notes payable	3,402,606	3,402,606	-	-	-
	<u>\$ 3,612,563</u>	<u>\$ 3,536,602</u>	<u>\$ 75,961</u>	<u>\$ -</u>	<u>\$ -</u>

(1) Convertible notes payable includes \$1,147,540 that converts into common stock at the maturity date during 2020 and \$2,255,066 under various convertible promissory notes as of March 31, 2020 including \$1,184,066 owed to entities controlled by our chairman. We expect to incur capital expenditures related to the development of the “Bio-RFID™” and “ChromaID™” technologies. None of the expenditures are contractual obligations as of March 31, 2020.

Off-Balance Sheet Arrangements

We do not have any off-balance sheet arrangements (as that term is defined in Item 303 of Regulation S-K) that are reasonably likely to have a current or future material effect on our financial condition, revenue or expenses, results of operations, liquidity, capital expenditures or capital resources.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK.

This item is not applicable.

ITEM 4. CONTROLS AND PROCEDURES

a) Evaluation of Disclosure Controls and Procedures

We conducted an evaluation, under the supervision and with the participation of our management, of the effectiveness of the design and operation of our disclosure controls and procedures. The term “disclosure controls and procedures,” as defined in Rules 13a-15(e) and 15d-15(e) under the Securities and Exchange Act of 1934, as amended (“Exchange Act”), means controls and other procedures of a company that are designed to ensure that information required to be disclosed by the company in the reports it files or submits under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified in the Securities and Exchange Commission's rules and forms. Disclosure controls and procedures also include, without limitation, controls and procedures designed to ensure that information required to be disclosed by a company in the reports that it files or submits under the Exchange Act is accumulated and communicated to the company's management, including its principal executive and principal financial officers, or persons performing similar functions, as appropriate, to allow timely decisions regarding required disclosure. Based on this evaluation, our principal executive and principal financial officers concluded as of March 31, 2020 that our disclosure controls and procedures were not effective at the reasonable assurance level due to the material weaknesses in our internal controls over financial reporting discussed immediately below.

Identified Material Weakness

A material weakness in our internal control over financial reporting is a control deficiency, or combination of control deficiencies, that results in more than a remote likelihood that a material misstatement of the financial statements will not be prevented or detected.

Management identified the following material weakness during its assessment of internal controls over financial reporting:

Personnel: We do not employ a full time Chief Financial Officer. Our Chairman serves as interim Chief Financial Officer. We utilize a consultant to assist with our financial reporting. During 2020, we expect to strengthen the finance staff and improve internal controls over documentation.

Audit Committee: While we have an audit committee, we lack a financial expert. During 2020, the Board expects to appoint an Audit Committee Chairman who is an “audit committee financial expert” as defined by the Securities and Exchange Commission (“SEC”) and as adopted under the Sarbanes-Oxley Act of 2002.

(b) Management's Report on Internal Control Over Financial Reporting.

Our management is responsible for establishing and maintaining adequate internal control over financial reporting as defined in Rules 13a-15(f) and 15d-15(f) under the Securities Exchange Act of 1934. Our internal control over financial reporting is a process designed by, or under the supervision of, our CEO and CFO, or persons performing similar functions, and effected by our board of directors, management and other personnel, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with accounting principles generally accepted in the United States of America (GAAP). Our internal control over financial reporting includes those policies and procedures that: (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and disposition of the assets of the Company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with GAAP and that receipts and expenditures of the Company are being made only in accordance with authorization of management and directors of the Company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the Company’s assets that could have a material effect on the financial statements.

Management assessed the effectiveness of the Company’s internal control over financial reporting as of March 31, 2020. In making this assessment, management used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission in the 2013 *Internal Control-Integrated Framework*. Based on its evaluation, management has concluded that the Company’s internal control over financial reporting was not effective as of March 31, 2020.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions or that the degree of compliance with the policies or procedures may deteriorate. A control system, no matter how well designed and operated can provide only reasonable, but not absolute, assurance that the control system’s objectives will be met. The design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their cost.

c) Changes in Internal Control over Financial Reporting

During the three months ended March 31, 2020, there were no changes in our internal controls over financial reporting during this fiscal quarter that materially affected, or is reasonably likely to have a materially affect, on our internal control over financial reporting.

PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

We may from time to time become a party to various legal proceedings arising in the ordinary course of our business. We are currently not a party to any pending legal proceeding that is not ordinary routine litigation incidental to our business.

ITEM 1A. RISK FACTORS

There are certain inherent risks which will have an effect on the Company's development in the future and the most significant risks and uncertainties known and identified by our management are described below.

RISK FACTORS

There are certain inherent risks which will have an effect on the Company's development in the future and the most significant risks and uncertainties known and identified by our management are described below.

Risks Related to Pandemics

The effects of the recent COVID-19 coronavirus pandemic are not immediately known, but may adversely affect our business, results of operations, financial condition, liquidity, and cash flow.

Presently, the impact of COVID-19 has not shown any imminent adverse effects on our business. This notwithstanding, it is still unknown and difficult to predict what adverse effects, if any, COVID-19 can have on our business, or against the various aspects of same.

As of the date of this Quarterly Report, COVID-19 coronavirus has been declared a pandemic by the World Health Organization, has been declared a National Emergency by the United States Government and has resulted in several states being designated disaster zones. COVID-19 coronavirus caused significant volatility in global markets. The spread of COVID-19 coronavirus has caused public health officials to recommend precautions to mitigate the spread of the virus, especially as to travel and congregating in large numbers. In addition, certain states and municipalities have enacted, and additional cities are considering, quarantining and "shelter-in-place" regulations which severely limit the ability of people to move and travel and require non-essential businesses and organizations to close. While some states are considering lifting their "shelter-in-place" restrictions and travel bans, as they are removed there is no certainty that an outbreak will not occur and additional restrictions imposed again in response.

It is unclear how such restrictions, which will contribute to a general slowdown in the global economy, will affect our business, results of operations, financial condition and our future strategic plans.

Recent shelter-in-place and essential-only travel regulations could negatively impact our customers. In addition, while our products are manufactured in the United States, we still could experience significant supply chain disruptions due to interruptions in operations at any or all of our suppliers' facilities or downline suppliers. If we experience significant delays in receiving our products we will experience delays in fulfilling orders and ultimately receiving payment, which could result in loss of sales and a loss of customers, and adversely impact our financial condition and results of operations. The current status of COVID-19 coronavirus closures and restrictions could also negatively impact our ability to receive funding from our existing capital sources as each business is and has been affected uniquely.

In addition, our headquarters are located in Seattle, Washington which was also recently subject of large COVID-19 outbreak. In response, Washington State governor, Jay Inslee, mandated a minimum 2 week stay at home order with exceptions only for essential businesses. While these restrictions are relatively recent as of the date of this Report, it is unclear at this time how these restrictions will be amended as the pandemic evolves. We are hopeful that COVID-19 closures will have only a limited effect on our operations and revenues.

General securities market uncertainties resulting from the COVID-19 pandemic.

Since the outset of the pandemic the United States and worldwide national securities markets have undergone unprecedented stress due to the uncertainties of the pandemic and the resulting reactions and outcomes of government, business and the general population. These uncertainties have resulted in declines in all market sectors, increases in volumes due to flight to safety and governmental actions to support the markets. As a result, until the pandemic has stabilized, the markets may not be available to the Company for purposes of raising required capital. Should we not be able to obtain financing when required, in the amounts necessary to execute on our plans in full, or on terms which are economically feasible we may be unable to sustain the necessary capital to pursue our strategic plan and may have to reduce the planned future growth and/or scope of our operations.

Risks Relating to the Company Generally

We need additional financing to support our technology development and ongoing operations, pay our debts and maintain ownership of our intellectual properties.

We are currently operating at a loss. We believe that our cash on hand including the funds closed subsequent to March 31, 2020 will be sufficient to fund our operations through early 2021. We will need additional financing to implement our business plan and to service our ongoing operations, pay our current debts (described below) and maintain ownership of our intellectual property. There can be no assurance that we will be able to secure any needed funding, or that if such funding is available, the terms or conditions would be acceptable to us. If we are unable to obtain additional financing when it is needed, we will need to restructure our operations and/or divest all or a portion of our business. We are seeking additional capital through a combination of private and public equity offerings, debt financings and strategic collaborations. Debt financing, if obtained, may involve agreements that include covenants limiting or restricting our ability to take specific actions, such as incurring additional debt, and could increase our expenses and require that our assets secure such debt. Equity financing, if obtained, could result in dilution to our then-existing stockholders and/or require such stockholders to waive certain rights and preferences. If such financing is not available on satisfactory terms, or is not available at all, we may be required to delay, scale back, eliminate the development of business opportunities and our operations and financial condition may be materially adversely affected. There can be no assurance that we will be able to sell that number of shares, if any.

We need to continue as a going concern if our business is to succeed.

Because of our recurring losses and negative cash flows from operations, the audit report of our independent registered public accountants on our consolidated financial statements for the year ended September 30, 2019 contains an explanatory paragraph stating that there is substantial doubt about our ability to continue as a going concern. Factors identified in the report include our historical net losses, negative working capital, and the need for additional financing to implement our business plan and service our debt repayments. If we are not able to attain profitability in the near future our financial condition could deteriorate further, which would have a material adverse impact on our business and prospects and result in a significant or complete loss of your investment. Further, we may be unable to pay our debt obligations as they become due, which include obligations to secured creditors. If we are unable to continue as a going concern, we might have to liquidate our assets and the values we receive for our assets in liquidation or dissolution could be significantly lower than the values reflected in our financial statements. Additionally, we are subject to customary operational covenants, including limitations on our ability to incur liens or additional debt, pay dividends, redeem stock, make specified investments and engage in merger, consolidation or asset sale transactions, among other restrictions. In addition, the inclusion of an explanatory paragraph regarding substantial doubt about our ability to continue as a going concern and our lack of cash resources may materially adversely affect our share price and our ability to raise new capital or to enter into critical contractual relations with third parties.

As of March 31, 2020, we owe approximately \$2,868,591 and if we do not satisfy these obligations, the lenders may have the right to demand payment in full or exercise other remedies.

Mr. Erickson, our current chairman, and/or entities with which he is affiliated also have accrued compensation, travel and interest of approximately \$613,525 as of March 31, 2020.

We owe \$2,255,066 under various convertible promissory notes as of March 31, 2020 including \$1,184,066 owed to entities controlled by our chairman.

This excludes \$1,147,540 of Convertible Notes and interest from a private placement to accredited investors in 2019. The Convertible Notes and interested were automatically converted to Common Stock at \$1.00 per share on the one year anniversary starting on February 15, 2020.

During the three months ended March 31, 2020, we issued 4,114,800 shares of common stock related to the automatic conversion of Convertible Notes and interest from a private placement to accredited investors in 2019. The Convertible Notes and interested were automatically converted to Common Stock at \$1.00 per share on the one year anniversary starting on February 15, 2020.

We require additional financing, to service and/or repay these debt obligations. If we raise additional capital through borrowing or other debt financing, we may incur substantial interest expense. If and when we raise more equity capital in the future, it will result in substantial dilution to our current stockholders.

We have a history of operating losses and there can be no assurance that we can achieve or maintain profitability.

We have experienced net losses since inception. As of March 31, 2020, we had an accumulated deficit of \$48,849,000 and net losses in the amount of \$6,346,000, \$7,612,000 and \$3,258,000 for the six months ended March 31, 2020 and the years ended September 30, 2019 and 2018, respectively. During the six months ended March 31, 2020, the Company incurred non-cash expenses of \$4,510,000.

There can be no assurance that we will achieve or maintain profitability. If we achieve profitability in the future, we may not be able to sustain profitability in subsequent periods. Failure to become and remain profitable would impair our ability to sustain operations and adversely affect the price of our common stock and our ability to raise capital. Our operating expenses may increase as we spend resources on growing our business, and if our revenue does not correspondingly increase, our operating results and financial condition will suffer. Our ChromaID and Bio-RFID business has produced minimal revenues and may not produce significant revenues in the near term, or at all, which would harm our ability to continue our operations or obtain additional financing and require us to reduce or discontinue our operations. You must consider our business and prospects in light of the risks and difficulties we will encounter as business with an early-stage technology in a new and rapidly evolving industry. We may not be able to successfully address these risks and difficulties, which could significantly harm our business, operating results and financial condition.

If the company were to dissolve or wind-up operations, holders of our common stock would not receive a liquidation preference.

If we were to wind-up or dissolve our company and liquidate and distribute our assets, our common stockholders would share in our assets only after we satisfy any amounts we owe to our creditors and preferred equity holders. If our liquidation or dissolution were attributable to our inability to profitably operate our business, then it is likely that we would have material liabilities at the time of liquidation or dissolution. Accordingly, it is very unlikely that sufficient assets will remain available after the payment of our creditors and preferred equity holders to enable common stockholders to receive any liquidation distribution with respect to any common stock.

We may not be able to generate sufficient revenue from the commercialization of our ChromaID and Bio-RFID technology and related products to achieve or sustain profitability.

We are in the early stages of commercializing our ChromaID and Bio-RFID technology. Failure to develop and sell products based upon our ChromaID and Bio-RFID technology, grant additional licenses and obtain royalties or develop other revenue streams will have a material adverse effect on our business, financial condition and results of operations.

To date, we have generated minimal revenue from sales of our ChromaID and Bio-RFID products. We believe that our commercialization success is dependent upon our ability to significantly increase the number of customers that are using our products. In addition, demand for our products may not materialize, or increase as quickly as planned, and we may therefore be unable to increase our revenue levels as expected. We are currently not profitable. Even if we succeed in introducing our technology and related products to our target markets, we may not be able to generate sufficient revenue to achieve or sustain profitability.

We currently rely in part upon external resources for engineering and product development services. If we are unable to secure an engineering or product development partner or establish satisfactory engineering and product development capabilities, we may not be able to successfully commercialize our ChromaID and Bio-RFID technology.

Our success depends upon our ability to develop products that are accurate and provide solutions for our customers. Achieving the desired results for our customers requires solving engineering issues in concert with them. Any failure of our ChromaID and Bio-RFID technology or related products to meet customer expectations could result in customers choosing to retain their existing methods or to adopt systems other than ours.

We have not historically had sufficient internal resources which can work on engineering and product development matters. We have used third parties in the past and will continue to do so. These resources are not always readily available and the absence of their availability could inhibit our research and development efforts and our responsiveness to our customers. Our inability to secure those resources could impact our ability to provide engineering and product development services and could have an impact on our customers' willingness to use our technology.

We are in the early stages of commercialization and our ChromaID and Bio-RFID technology and related products may never achieve significant commercial market acceptance.

Our success depends on our ability to develop and market products that are recognized as accurate and cost-effective. Many of our potential customers may be reluctant to use our new technology. Market acceptance will depend on many factors, including our ability to convince potential customers that our ChromaID and Bio-RFID technology and related products are an attractive alternative to existing light-based technologies. We will need to demonstrate that our products provide accurate and cost-effective alternatives to existing light-based authentication technologies. Compared to most competing technologies, our technology is relatively new, and most potential customers have limited knowledge of, or experience with, our products. Prior to implementing our technology and related products, some potential customers may be required to devote significant time and effort to testing and validating our products. In addition, during the implementation phase, some customers may be required to devote significant time and effort to training their personnel on appropriate practices to ensure accurate results from our technology and products. Any failure of our technology or related products to meet customer expectations could result in customers choosing to retain their existing testing methods or to adopt systems other than ours.

Many factors influence the perception of a system including its use by leaders in the industry. If we are unable to induce industry leaders in our target markets to implement and use our technology and related products, acceptance and adoption of our products could be slowed. In addition, if our products fail to gain significant acceptance in the marketplace and we are unable to expand our customer base, we may never generate sufficient revenue to achieve or sustain profitability.

Our management has concluded that we have material weaknesses in our internal controls over financial reporting and that our disclosure controls and procedures are not effective.

A material weakness is a deficiency, or a combination of deficiencies, in internal control over financial reporting, such that there is a reasonable possibility that a material misstatement of a company's annual or interim financial statements will not be prevented or detected on a timely basis. During the audit of our financial statements for the year ended September 30, 2019, our management identified material weaknesses in our internal control over financial reporting. If these weaknesses continue, investors could lose confidence in the accuracy and completeness of our financial reports and other disclosures.

In addition, our management has concluded that our disclosure controls and procedures were not effective due to the lack of an audit committee "financial expert." These material weaknesses, if not remediated, create an increased risk of misstatement of the Company's financial results, which, if material, may require future restatement thereof. A failure to implement improved internal controls, or difficulties encountered in their implementation or execution, could cause future delays in our reporting obligations and could have a negative effect on us and the trading price of our common stock.

If components used in our finished products become unavailable, or third-party manufacturers otherwise experience delays, we may incur delays in shipment to our customers, which would damage our business.

We depend on third-party manufacturers and suppliers for substantially all of our components and products that are used in our ChromaID and Bio-RFID products. We purchase these products and components from third-party suppliers and we believe that alternative sources of supply are readily available for most products and components. However, consolidation could result in one or more current suppliers being acquired by a competitor, rendering us unable to continue purchasing necessary amounts of key components at competitive prices. In addition, for certain of our customized components, arrangements for additional or replacement suppliers will take time and result in delays. We purchase products and components pursuant to purchase orders placed from time to time in the ordinary course of business. This means we are vulnerable to unanticipated price increases and product shortages. Any interruption or delay in the supply of components and products, or our inability to obtain components and products from alternate sources at acceptable prices in a timely manner, could harm our business, financial condition and results of operations.

While we believe alternative manufacturers for these products are available, we have selected these particular manufacturers based on their ability to consistently produce these products per our specifications ensuring the best quality product at the most cost-effective price. We depend on our third-party manufacturers to satisfy performance and quality specifications and to dedicate sufficient production capacity within scheduled delivery times. Accordingly, the loss of all or one of these manufacturers or delays in obtaining shipments could have a material adverse effect on our operations until such time as an alternative manufacturer could be found.

Revenues of our wholly-owned subsidiary, TransTech, have declined

We have not been able to successfully address this revenue decline of this subsidiary during the three months ended March 31, 2020, which is expected to result in the winding down of operations by June 30, 2020. The loss of the TransTech subsidiary revenue will impact our top line revenues and its operating results and may result in expenses associated with the winding down.

We are dependent on key personnel.

Our success depends to a significant degree upon the continued contributions of key management and other personnel, some of whom could be difficult to replace, including Ronald P. Erickson, our Chairman and Phil Bosua, our Chief Executive Officer. We maintain key person life insurance on our Chief Executive Officer, Phil Bosua. Our success will depend on the performance of our officers, our ability to retain and motivate our officers, our ability to integrate new officers into our operations, and the ability of all personnel to work together effectively as a team. Our failure to retain and recruit officers and other key personnel could have a material adverse effect on our business, financial condition and results of operations. Our success also depends on our continued ability to identify, attract, hire, train, retain and motivate highly skilled technical, managerial, manufacturing, administrative and sales and marketing personnel. Competition for these individuals is intense, and we may not be able to successfully recruit, assimilate or retain sufficiently qualified personnel. In particular, we may encounter difficulties in recruiting and retaining a sufficient number of qualified technical personnel, which could harm our ability to develop new products and adversely impact our relationships with existing and future customers. The inability to attract and retain necessary technical, managerial, manufacturing, administrative and sales and marketing personnel could harm our ability to obtain new customers and develop new products and could adversely affect our business and operating results.

We have limited insurance which may not cover claims by third parties against us or our officers and directors.

We have limited directors' and officers' liability insurance and commercial liability insurance policies. Claims by third parties against us may exceed policy amounts and we may not have amounts to cover these claims. Any significant claims would have a material adverse effect on our business, financial condition and results of operations. In addition, our limited directors' and officers' liability insurance may affect our ability to attract and retain directors and officers.

Our inability to effectively protect our intellectual property would adversely affect our ability to compete effectively, our revenue, our financial condition and our results of operations.

We rely on a combination of patent, trademark, and trade secret laws, confidentiality procedures and licensing arrangements to protect our intellectual property rights. Obtaining and maintaining a strong patent position is important to our business. Patent law relating to the scope of claims in the technology fields in which we operate is complex and uncertain, so we cannot be assured that we will be able to obtain or maintain patent rights, or that the patent rights we may obtain will be valuable, provide an effective barrier to competitors or otherwise provide competitive advantages. Others have filed, and in the future are likely to file, patent applications that are similar or identical to ours or those of our licensors. To determine the priority of inventions, or demonstrate that we did not derive our invention from another, we may have to participate in interference or derivation proceedings in the USPTO or in court that could result in substantial costs in legal fees and could substantially affect the scope of our patent protection. We cannot be assured our patent applications will prevail over those filed by others. Also, our intellectual property rights may be subject to other challenges by third parties. Patents we obtain could be challenged in litigation or in administrative proceedings such as *ex parte* reexam, *inter partes* review, or post grant review in the United States or opposition proceedings in Europe or other jurisdictions.

There can be no assurance that:

- any of our existing patents will continue to be held valid, if challenged;
- patents will be issued for any of our pending applications;
- any claims allowed from existing or pending patents will have sufficient scope or strength to protect us;
- our patents will be issued in the primary countries where our products are sold in order to protect our rights and potential commercial advantage; or
- any of our products or technologies will not infringe on the patents of other companies.

If we are enjoined from selling our products, or if we are required to develop new technologies or pay significant monetary damages or are required to make substantial royalty payments, our business and results of operations would be harmed.

Obtaining and maintaining a patent portfolio entails significant expense and resources. Part of the expense includes periodic maintenance fees, renewal fees, annuity fees, various other governmental fees on patents and/or applications due in several stages over the lifetime of patents and/or applications, as well as the cost associated with complying with numerous procedural provisions during the patent application process. We may or may not choose to pursue or maintain protection for particular inventions. In addition, there are situations in which failure to make certain payments or noncompliance with certain requirements in the patent process can result in abandonment or lapse of a patent or patent application, resulting in partial or complete loss of patent rights in the relevant jurisdiction. If we choose to forgo patent protection or allow a patent application or patent to lapse purposefully or inadvertently, our competitive position could suffer.

Legal actions to enforce our patent rights can be expensive and may involve the diversion of significant management time. In addition, these legal actions could be unsuccessful and could also result in the invalidation of our patents or a finding that they are unenforceable. We may or may not choose to pursue litigation or interferences against those that have infringed on our patents, or used them without authorization, due to the associated expense and time commitment of monitoring these activities. If we fail to protect or to enforce our intellectual property rights successfully, our competitive position could suffer, which could have a material adverse effect on our results of operations and business.

Claims by others that our products infringe their patents or other intellectual property rights could prevent us from manufacturing and selling some of our products or require us to pay royalties or incur substantial costs from litigation or development of non-infringing technology.

In recent years, there has been significant litigation in the United States involving patents and other intellectual property rights. We may receive notices that claim we have infringed upon the intellectual property of others. Even if these claims are not valid, they could subject us to significant costs. Any such claims, with or without merit, could be time-consuming to defend, result in costly litigation, divert our attention and resources, cause product shipment delays or require us to enter into royalty or licensing agreements. Such royalty or licensing agreements, if required, may not be available on terms acceptable to us or at all. We have engaged in litigation and litigation may be necessary in the future to enforce our intellectual property rights or to determine the validity and scope of the proprietary rights of others. Litigation may also be necessary to defend against claims of infringement or invalidity by others. A successful claim of intellectual property infringement against us and our failure or inability to license the infringed technology or develop or license technology with comparable functionality could have a material adverse effect on our business, financial condition and operating results.

If we are unable to secure a sales and marketing partner or establish satisfactory sales and marketing capabilities at Know Labs we may not be able to successfully commercialize our technology.

If we are not successful entering into appropriate collaboration arrangements or recruiting sales and marketing personnel or in building a sales and marketing infrastructure, we will have difficulty successfully commercializing our technology, which would adversely affect our business, operating results and financial condition.

We may not be able to enter into collaboration agreements on terms acceptable to us or at all. In addition, even if we enter into such relationships, we may have limited or no control over the sales, marketing and distribution activities of these third parties. Our future revenues may depend heavily on the success of the efforts of these third parties. If we elect to establish a sales and marketing infrastructure we may not realize a positive return on this investment. In addition, we must compete with established and well-funded pharmaceutical and biotechnology companies to recruit, hire, train and retain sales and marketing personnel. Factors that may inhibit our efforts to commercialize technology without strategic partners or licensees include:

- our inability to recruit and retain adequate numbers of effective sales and marketing personnel;
- the lack of complementary products to be offered by sales personnel, which may put us at a competitive disadvantage relative to companies with more extensive product lines; and
- unforeseen costs and expenses associated with creating an independent sales and marketing organization.

Government regulatory approval may be necessary before some of our products can be sold and there is no assurance such approval will be granted.

Our technology may have a number of potential applications in fields of use which will require prior governmental regulatory approval before the technology can be introduced to the marketplace. For example, we are exploring the use of our technology for certain medical diagnostic applications, with an initial focus on the continuous monitoring of blood glucose.

There is no assurance that we will be successful in developing continuous glucose monitoring (CGM) medical applications for our technology.

If we were to be successful in developing continuous glucose monitoring medical applications of our technology, prior approval by the FDA and other governmental regulatory bodies will be required before the technology could be introduced into the marketplace.

There is no assurance that such regulatory approval would be obtained for a continuous glucose monitoring medical diagnostic or other applications requiring such approval.

The FDA can refuse to grant, delay, and limit or deny approval of an application for approval of our UBAND CGM for many reasons.

We may not obtain the necessary regulatory approvals or clearances to market these continuous glucose monitoring systems in the United States or outside of the United States.

Any delay in, or failure to receive or maintain, approval or clearance for our products could prevent us from generating revenue from these products or achieving profitability.

Cybersecurity risks and cyber incidents could result in the compromise of confidential data or critical data systems and give rise to potential harm to customers, remediation and other expenses, expose us to liability under HIPAA, consumer protection laws, or other common law theories, subject us to litigation and federal and state governmental inquiries, damage our reputation, and otherwise be disruptive to our business and operations.

Cyber incidents can result from deliberate attacks or unintentional events. We collect and store on our networks sensitive information, including intellectual property, proprietary business information and personally identifiable information of our customers. The secure maintenance of this information and technology is critical to our business operations. We have implemented multiple layers of security measures to protect the confidentiality, integrity and availability of this data and the systems and devices that store and transmit such data. We utilize current security technologies, and our defenses are monitored and routinely tested internally and by external parties. Despite these efforts, threats from malicious persons and groups, new vulnerabilities and advanced new attacks against information systems create risk of cybersecurity incidents. These incidents can include, but are not limited to, gaining unauthorized access to digital systems for purposes of misappropriating assets or sensitive information, corrupting data, or causing operational disruption. Because the techniques used to obtain unauthorized access, disable or degrade service, or sabotage systems change frequently and may not immediately produce signs of intrusion, we may be unable to anticipate these incidents or techniques, timely discover them, or implement adequate preventative measures.

These threats can come from a variety of sources, ranging in sophistication from an individual hacker to malfeasance by employees, consultants or other service providers to state-sponsored attacks. Cyber threats may be generic, or they may be custom-crafted against our information systems. Over the past several years, cyber-attacks have become more prevalent and much harder to detect and defend against. Our network and storage applications may be vulnerable to cyber-attack, malicious intrusion, malfeasance, loss of data privacy or other significant disruption and may be subject to unauthorized access by hackers, employees, consultants or other service providers. In addition, hardware, software or applications we develop or procure from third parties may contain defects in design or manufacture or other problems that could unexpectedly compromise information security. Unauthorized parties may also attempt to gain access to our systems or facilities through fraud, trickery or other forms of deceiving our employees, contractors and temporary staff.

There can be no assurance that we will not be subject to cybersecurity incidents that bypass our security measures, impact the integrity, availability or privacy of personal health information or other data subject to privacy laws or disrupt our information systems, devices or business, including our ability to deliver services to our customers. As a result, cybersecurity, physical security and the continued development and enhancement of our controls, processes and practices designed to protect our enterprise, information systems and data from attack, damage or unauthorized access remain a priority for us. As cyber threats continue to evolve, we may be required to expend significant additional resources to continue to modify or enhance our protective measures or to investigate and remediate any cybersecurity vulnerabilities.

We may engage in acquisitions, mergers, strategic alliances, joint ventures and divestitures that could result in final results that are different than expected

In the normal course of business, we engage in discussions relating to possible acquisitions, equity investments, mergers, strategic alliances, joint ventures and divestitures. Such transactions are accompanied by a number of risks, including the use of significant amounts of cash, potentially dilutive issuances of equity securities, incurrence of debt on potentially unfavorable terms as well as impairment expenses related to goodwill and amortization expenses related to other intangible assets, the possibility that we may pay too much cash or issue too many of our shares as the purchase price for an acquisition relative to the economic benefits that we ultimately derive from such acquisition, and various potential difficulties involved in integrating acquired businesses into our operations.

From time to time, we have also engaged in discussions with candidates regarding the potential acquisitions of our product lines, technologies and businesses. If a divestiture such as this does occur, we cannot be certain that our business, operating results and financial condition will not be materially and adversely affected. A successful divestiture depends on various factors, including our ability to effectively transfer liabilities, contracts, facilities and employees to any purchaser; identify and separate the intellectual property to be divested from the intellectual property that we wish to retain; reduce fixed costs previously associated with the divested assets or business; and collect the proceeds from any divestitures.

If we do not realize the expected benefits of any acquisition or divestiture transaction, our financial position, results of operations, cash flows and stock price could be negatively impacted.

We have made strategic acquisitions in the past and may do so in the future, and if the acquired companies do not perform as expected, this could adversely affect our operating results, financial condition and existing business.

We may continue to expand our business through strategic acquisitions. The success of any acquisition will depend on, among other things:

- the availability of suitable candidates;
- higher than anticipated acquisition costs and expenses;
- competition from other companies for the purchase of available candidates;
- our ability to value those candidates accurately and negotiate favorable terms for those acquisitions;
- the availability of funds to finance acquisitions and obtaining any consents necessary under our credit facility;
- the ability to establish new informational, operational and financial systems to meet the needs of our business;
- the ability to achieve anticipated synergies, including with respect to complementary products or services; and
- the availability of management resources to oversee the integration and operation of the acquired businesses.

We may not be successful in effectively integrating acquired businesses and completing acquisitions in the future. We also may incur substantial expenses and devote significant management time and resources in seeking to complete acquisitions. Acquired businesses may fail to meet our performance expectations. If we do not achieve the anticipated benefits of an acquisition as rapidly as expected, or at all, investors or analysts may not perceive the same benefits of the acquisition as we do. If these risks materialize, our stock price could be materially adversely affected.

We are subject to corporate governance and internal control requirements, and our costs related to compliance with, or our failure to comply with existing and future requirements could adversely affect our business.

We must comply with corporate governance requirements under the Sarbanes-Oxley Act of 2002 and the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010, as well as additional rules and regulations currently in place and that may be subsequently adopted by the SEC and the Public Company Accounting Oversight Board. These laws, rules, and regulations continue to evolve and may become increasingly stringent in the future. The financial cost of compliance with these laws, rules, and regulations is expected to remain substantial.

Our management has concluded that our disclosure controls and procedures were not effective due to the lack of an audit committee “financial expert.” We expect to appoint an additional independent director to serve as Audit Committee Chairman. This director will be an “audit committee financial expert” as defined by the SEC. However, we cannot assure you that we will be able to fully comply with these laws, rules, and regulations that address corporate governance, internal control reporting, and similar matters in the future. Failure to comply with these laws, rules and regulations could materially adversely affect our reputation, financial condition, and the value of our securities.

The exercise prices of certain warrants, convertible notes payable and the Series C and D Preferred Shares may require further adjustment.

In the future, if we sell our common stock at a price below \$0.25 per share, the exercise price of 8,108,356 outstanding shares of Series C and D Preferred Stock that adjust below \$0.25 per share pursuant to the documents governing such instruments. In addition, the conversion price of a Convertible Note Payable of \$3,402,606 (9,020,264 common shares at the current price of \$0.25 per share and 1,147,540 shares at \$1.00 per share) and the exercise price of additional outstanding warrants to purchase 12,838,286 shares of common stock would adjust below \$0.25 per share pursuant to the documents governing such instruments. Warrants totaling 2,755,717 would adjust below \$1.20 per share pursuant to the documents governing such instruments.

Risks Relating to Our Stock

The price of our common stock is volatile, which may cause investment losses for our stockholders

The market price of our common stock has been and is likely in the future to be volatile. Our common stock price may fluctuate in response to factors such as:

- Announcements by us regarding liquidity, significant acquisitions, equity investments and divestitures, strategic relationships, addition or loss of significant customers and contracts, capital expenditure commitments and litigation;
- Issuance of convertible or equity securities and related warrants for general or merger and acquisition purposes;
- Issuance or repayment of debt, accounts payable or convertible debt for general or merger and acquisition purposes;
- Sale of a significant number of shares of our common stock by stockholders;
- General market and economic conditions;
- Quarterly variations in our operating results;
- Investor and public relation activities;
- Announcements of technological innovations;
- New product introductions by us or our competitors;
- Competitive activities;
- Low liquidity; and
- Additions or departures of key personnel.

These broad market and industry factors may have a material adverse effect on the market price of our common stock, regardless of our actual operating performance. These factors could have a material adverse effect on our business, financial condition and results of operations.

Transfers of our securities may be restricted by virtue of state securities “blue sky” laws, which prohibit trading absent compliance with individual state laws. These restrictions may make it difficult or impossible to sell shares in those states.

Transfers of our common stock may be restricted under the securities or securities regulations laws promulgated by various states and foreign jurisdictions, commonly referred to as “blue sky” laws. Absent compliance with such individual state laws, our common stock may not be traded in such jurisdictions. Because the securities held by many of our stockholders have not been registered for resale under the blue sky laws of any state, the holders of such shares and persons who desire to purchase them should be aware that there may be significant state blue sky law restrictions upon the ability of investors to sell the securities and of purchasers to purchase the securities. These restrictions may prohibit the secondary trading of our common stock. Investors should consider the secondary market for our securities to be a limited one.

Four individual investors could have significant influence over matters submitted to stockholders for approval

As of March 31, 2020, four individuals in the aggregate, assuming the exercise of all warrants to purchase common stock, hold shares representing approximately 55.9% of our common stock on a fully-converted basis and could be considered a control group for purposes of SEC rules. However, the agreement with one of these individuals limits his ownership to 4.99% individually. Beneficial ownership includes shares over which an individual or entity has investment or voting power and includes shares that could be issued upon the exercise of options and warrants within 60 days after the date of determination. If these persons were to choose to act together, they would be able to significantly influence all matters submitted to our stockholders for approval, as well as our officers, directors, management and affairs. For example, these persons, if they choose to act together, could significantly influence the election of directors and approval of any merger, consolidation or sale of all or substantially all of our assets. This concentration of voting power could delay or prevent an acquisition of us on terms that other stockholders may desire.

The sale of a significant number of our shares of common stock could depress the price of our common stock.

Sales or issuances of a large number of shares of common stock in the public market or the perception that sales may occur could cause the market price of our common stock to decline. As of March 31, 2020, we had 23,324,128 shares of common stock issued and outstanding, held by 135 stockholders of record. The number of stockholders, including beneficial owners holding shares through nominee names, is approximately 2,300. Each share of common stock entitles its holder to one vote on each matter submitted to the stockholders for a vote, and no cumulative voting for directors is permitted. Stockholders do not have any preemptive rights to acquire additional securities issued by us. As of March 31, 2020, there were options outstanding for the purchase of 4,891,334 common shares (including unearned stock option grants totaling 2,680,000 shares), warrants for the purchase of 17,755,448 common shares, and 8,108,356 shares of our common stock issuable upon the conversion of Series C and Series D Convertible Preferred Stock. In addition, we have 10,167,804 common shares (9,020,264 common shares at the current price of \$0.25 per share and 1,147,540 common shares at the current price of \$1.00 per share) and are issuable upon conversion of convertible debentures of \$3,402,606. All of which could potentially dilute future earnings per share.

Significant shares of common stock are held by our principal stockholders, other company insiders and other large stockholders. As “affiliates” of Know Labs, as defined under Securities and Exchange Commission Rule 144 under the Securities Act of 1933, our principal stockholders, other of our insiders and other large stockholders may only sell their shares of common stock in the public market pursuant to an effective registration statement or in compliance with Rule 144.

These options, warrants, convertible notes payable and convertible preferred stock could result in further dilution to common stockholders and may affect the market price of the common stock.

Future issuance of additional shares of common stock and/or preferred stock could dilute existing stockholders. We have and may issue preferred stock that could have rights that are preferential to the rights of common stock that could discourage potentially beneficial transactions to our common stockholders.

Pursuant to our certificate of incorporation, we currently have authorized 100,000,000 shares of common stock and 5,000,000 shares of preferred stock. To the extent that common shares are available for issuance, subject to compliance with applicable stock exchange listing rules, our board of directors has the ability to issue additional shares of common stock in the future for such consideration as the board of directors may consider sufficient. The issuance of any additional securities could, among other things, result in substantial dilution of the percentage ownership of our stockholders at the time of issuance, result in substantial dilution of our earnings per share and adversely affect the prevailing market price for our common stock.

An issuance of additional shares of preferred stock could result in a class of outstanding securities that would have preferences with respect to voting rights and dividends and in liquidation over our common stock and could, upon conversion or otherwise, have all of the rights of our common stock. Our Board of Directors’ authority to issue preferred stock could discourage potential takeover attempts or could delay or prevent a change in control through merger, tender offer, proxy contest or otherwise by making these attempts more difficult or costly to achieve. The issuance of preferred stock could impair the voting, dividend and liquidation rights of common stockholders without their approval.

Future capital raises may dilute our existing stockholders’ ownership and/or have other adverse effects on our operations.

If we raise additional capital by issuing equity securities, our existing stockholders’ percentage ownership will be reduced and these stockholders may experience substantial dilution. We may also issue equity securities that provide for rights, preferences and privileges senior to those of our common stock. If we raise additional funds by issuing debt securities, these debt securities would have rights senior to those of our common stock and the terms of the debt securities issued could impose significant restrictions on our operations, including liens on our assets. If we raise additional funds through collaborations and licensing arrangements, we may be required to relinquish some rights to our technologies or candidate products, or to grant licenses on terms that are not favorable to us.

We do not anticipate paying any cash dividends on our capital stock in the foreseeable future.

We have never declared or paid cash dividends on our capital stock. We currently intend to retain all of our future earnings, if any, to finance the growth and development of our business, and we do not anticipate paying any cash dividends on our capital stock in the foreseeable future. In addition, the terms of any future debt agreements may preclude us from paying dividends. As a result, capital appreciation, if any, of our common stock will be your sole source of gain for the foreseeable future.

Anti-takeover provisions may limit the ability of another party to acquire our company, which could cause our stock price to decline.

Our certificate of incorporation, as amended, our bylaws and Nevada law contain provisions that could discourage, delay or prevent a third party from acquiring our company, even if doing so may be beneficial to our stockholders. In addition, these provisions could limit the price investors would be willing to pay in the future for shares of our common stock.

Our articles of incorporation allow for our board to create new series of preferred stock without further approval by our stockholders, which could adversely affect the rights of the holders of our common stock.

Our Board of Directors has the authority to fix and determine the relative rights and preferences of preferred stock. Our Board of Directors also has the authority to issue preferred stock without further stockholder approval. As a result, our Board of Directors could authorize the issuance of a series of preferred stock that would grant to holders the preferred right to our assets upon liquidation, the right to receive dividend payments before dividends are distributed to the holders of common stock and the right to the redemption of the shares, together with a premium, prior to the redemption of our common stock. In addition, our Board of Directors could authorize the issuance of a series of preferred stock that has greater voting power than our common stock or that is convertible into our common stock, which could decrease the relative voting power of our common stock or result in dilution to our existing stockholders.

We or our manufacturers may be unable to obtain or maintain international regulatory clearances or approvals for our current or future products, or our distributors may be unable to obtain necessary qualifications, which could harm our business.

Sales of the Know Labs UBAND internationally are subject to foreign regulatory requirements that vary widely from country to country. In addition, the FDA regulates exports of medical devices from the U.S. Complying with international regulatory requirements can be an expensive and time-consuming process, and marketing approval or clearance is not certain. The time required to obtain clearances or approvals, if required by other countries, may be longer than that required for FDA clearance or approvals, and requirements for such clearances or approvals may significantly differ from FDA requirements. We may rely on third-party distributors to obtain regulatory clearances and approvals required in other countries, and these distributors may be unable to obtain or maintain such clearances or approvals. Our distributors may also incur significant costs in attempting to obtain and in maintaining foreign regulatory approvals or clearances, which could increase the difficulty of attracting and retaining qualified distributors. If our distributors experience delays in receiving necessary qualifications, clearances or approvals to market our products outside the U.S., or if they fail to receive those qualifications, clearances or approvals, we may be unable to market our products or enhancements in international markets effectively, or at all.

Foreign governmental authorities that regulate the manufacture and sale of medical devices have become increasingly stringent and, to the extent we market and sell our products outside of the U.S., we may be subject to rigorous international regulation in the future. In these circumstances, we would be required to rely on our foreign independent distributors to comply with the varying regulations, and any failures on their part could result in restrictions on the sale of our product in foreign countries.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

During the three months ended March 31, 2020, we had the following unregistered sales of equity securities:

On January 1, 2020, we issued 540,000 shares of restricted common stock to two Named Executive Officer, three directors and one consultant for services. The shares were issued in accordance with the 2011 Stock Incentive Plan and were valued at \$1.90 per share, the market price of our common stock, or \$1,026,000.

During the three months ended March 31, 2020, we issued 4,114,800 shares of common stock related to the automatic conversion of Convertible Notes and interest from a private placement to accredited investors in 2019. The Convertible Notes and interest were automatically converted to Common Stock at \$1.00 per share on the one year anniversary starting on February 15, 2020.

During the three months ended March 31, 2020, we issued 201,271 shares of common stock and cancelled warrants to purchase 208,671 shares of common stock at \$1.083 per share to four investors related to the cashless exercise of warrants.

ITEM 3. DEFAULTS UPON SENIOR SECURITIES

There have been no events which are required to be reported under this item.

ITEM 4. MINE SAFETY DISCLOSURES

N/A.

ITEM 5. OTHER INFORMATION

This item is not applicable.

ITEM 6. EXHIBITS

The exhibits required to be filed herewith by Item 601 of Regulation S-K, as described in the following index of exhibits, are attached hereto unless otherwise indicated as being incorporated by reference, as follows:

(a) Exhibits

Exhibit No.	Description
3.1	Restatement of the Articles of Incorporation dated September 13, 2013 (incorporated by reference to the Company's Current Report on Form 8-K/A2, filed September 17, 2013)
3.2	Amended and Restated Bylaws (incorporated by reference to the Company's Form 8-K, filed August 17, 2012)
3.3	Certificate of Amendment to the Restatement of the Articles of Incorporation dated June 11, 2015 (incorporated by reference to the Company's Current Report on Form 8-K, filed June 17, 2015)
3.4	Certificate of Designations, Preferences and Rights of Series C Convertible Preferred Stock (incorporated by reference to the Company's Current Report on Form 8-K, filed August 11, 2016)
3.5	Form of Series C Convertible Preferred Stock 2016 (incorporated by reference to the Company's Registration Statement on Form S-1, filed September 1, 2016)
3.6	Certificate of Correction and Certificate of Designations, Preferences and Rights of Series C Convertible Preferred Stock (incorporated by reference to the Company's Amended Current Report on Form 8-K/A, filed January 9, 2017)
3.7	Certificate of Designations, Preferences and Rights of Series D Convertible Preferred Stock (incorporated by reference to the Company's Current Report on Form 8-K, filed on February 10, 2017)
3.8	Amended and Restated Certificate of Designations, Preferences and Rights of Series D Convertible Preferred Stock. (incorporated by reference to the Company's Current Report on Form 8-K, filed May 5, 2017)
3.9	Second Amended and Restated Certificate of Designations, Preferences and Rights of Series D Convertible Preferred Stock (incorporated by reference to the Company's Current Report on Form 8-K, filed July 19, 2018)
3.10	Articles of Merger (incorporated by reference to the Company's Current Report on Form 8-K, filed May 3, 2018)

SECTION 302 CERTIFICATIONS

I, Phillip A. Bosua, certify that:

1. I have reviewed this quarterly report on Form 10-Q of Know Labs, Inc.;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer(a) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

**CERTIFICATION PURSUANT TO 18 U.S.C. SECTION 1350, AS ADOPTED
PURSUANT TO SECTION 906 OF THE SARBANES-OXLEY ACT OF 2002**

In connection with the Quarterly Report of Know Labs, Inc. (the "Company") on Form 10-Q for the quarter ended March 31, 2020 as filed with the Securities and Exchange Commission on the date hereof (the "Report"), I, Phillip A. Bosua, Chief Executive Officer of the Company, certify, pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002, to the best of my knowledge, that:

1. The Report fully complies with the requirements of Section 13(a) or 15(d) of the Securities Exchange Act of 1934, as amended; and
2. The information contained in the Report fairly presents, in all material respects, the financial condition and results of operations of the Company for the dates and periods covered by the Report.

This certificate is being made for the exclusive purpose of compliance by the Chief Executive and Financial and Accounting Officer of the Company with the requirements of Section 906 of the Sarbanes-Oxley Act of 2002, and may not be disclosed, distributed or used by any person or for any reason other than as specifically required by law.
